Encyclopedia of United States National Security Richard J. Congress. House. Committee on the Judiciary. Subcommittee on Criminal Justice,1987 *The New Agenda for International Relations* Stephanie Lawson,2013-07-08 There have been significant political eras which have shaped not only the structure of world politics but the way in which it has been studied The geopolitical and ideological contours of the Cold War period for example had an

impact on almost every aspect of world politics and the study of international relations for around 45 years This book argues that just as the collapse of the Soviet Union in the period following the fall of the Berlin Wall signalled the end of strategic polarization it also marked the apparent end of a particular form of polarized debate around political social and economic ideas The various new directions taken by scholars of international relations in the post Cold War era constitute a large part of a new agenda for the discipline This collection reflects the variety of issues and approaches that have become part and parcel of this agenda over the past ten years Issues tackled in this volume include the power of culture and ideology the concept of globalisation inequality human rights and security as well as reflections on new forms of polarization in the post Cold War world Each contributor addresses the nature of changes and continuities in world politics considers how the discipline of international relations itself has changed and reflects on possible directions for the twenty first Century This book will be of great interest to scholars of international relations global politics economics and related disciplines

Citizenship in Transnational Perspective Jatinder Mann,2023-09-19 This edited collection brings together leading and emerging international scholars who explore citizenship through the two overarching themes of Indigeneity and ethnicity They approach the subject from a range of disciplinary perspectives historical legal political and sociological Therefore this book makes an important and unique contribution to the existing literature through its transnational inter and multidisciplinary perspectives The collection includes scholars whose work on citizenship in settler societies moves beyond the idea of inclusion fitting into extant citizenship regimes to innovative models of inclusivity refitting existing models to reflect the multiple identities of an increasingly post national era and to promote the recognition of Indigenous citizenships and rights that were suppressed as a formative condition of citizenship in these societies **Albany Law Journal** ,1880
