**Understanding Synthetic Aperture Radar Images** Chris Oliver, Shaun Quegan, 2004 This practical reference shows SAR system designers and remote sensing specialists how to produce higher quality SAR images using data driven algorithms and apply powerful new techniques to measure and analyze SAR image content **Applied Mechanics Reviews**, 1993 *Gale Directory of Databases*, 2001 **The Federal Index**, 1978 *Bibliography of Agriculture*, 1991-04 *Who's who in Engineering*, 1995 *Reverse Acronyms, Initialisms, & Abbreviations Dictionary*, 1991 *Guide to U.S. Government Publications*, 2008-08 This comprehensive yet concise annual annotated reference source catalogs the important series periodicals and reference tools published by U S government agencies Over the years the index section of the Guide to U S Government Publications has expanded to more than 40 000 entries Agencies and titles are indexed followed by a keyword title index for quick and easy referencing No other single resource provides historical and current information on U S government publications in one place *Who's Who in Science and Engineering* 2008-2009 *Who's Who Marquis, Marquis Who's Who*, 2007-12 **Radar Foundations for Imaging and Advanced Concepts** Roger Sullivan, 2004 Through courses internally taught at IDA Dr Roger Sullivan has devised a book that brings readers fully up to speed on the most essential quantitative aspects of general radar in order to introduce study of the most exciting and relevant applications to radar imaging and advanced concepts Synthetic Aperture Radar 4 chapters Space time Adaptive Processing moving target indication MTI bistatic radar low probability of intercept LPI radar weather radar and ground penetrating radar Whether you are a radar novice or experienced professional this is an essential reference that features the theory and practical application of formulas you use in radar design every day With this book you are taken step by step through the development of modern airborne microwave radar up to the cutting edge of emergent technologies including new results on theoretical 2D and 3D ISAR point spread functions PSF and current discussions concerning dechirp deskew SAR processing layover in SAR images vibrating targets foliage penetration image quality parameters and more Plus for students of electrical engineering physics and radar this book provides the best source for basic airborne radar understanding as well as a broad introduction to the field of radar imaging **Japanese Technical Periodical Index**, 1986 *American Men & Women of Science* Pamela M. Kalte, Katherine H. Nemeh, Noah Schusterbauer, 2005 This edition profiles living persons in the physical and biological fields as well as public health scientists engineers mathematicians statisticians and computer scientists **American Men & Women of Science**, 2008 *The SciTech Radar and Defense Series*, *Bibliography of Agriculture with Subject Index*, 1991 **The Scientist**, 1988 **Radar Principles for the Non-Specialist** J.C. Toomay, Paul J. Hannen, 2004-06-30 This updated edition provides a solid understanding of radar fundamentals and applications with far less of the mathematical rigor and technical data presented in engineering books for specialists **Radar Principles for the Non-Specialist** John C. Toomay, 1989-04-27 What This Book Is This book is about radar It will teach you the essentials of radar the underlying

principles It is not like an engineering handbook which provides detailed design equations without explaining either derivation or rationale It is not like a graduate school textbook which may be abstruse and esoteric to the point of incomprehensibility And it is not like an anthology of popular magazine articles which may be gaudy but superficial It is an attempt to distill the very complex rich technology of radar into its fundamentals tying them to the laws of nature on one end and to the most modern and complex systems on the other Who It's For If your work requires you to supervise or meet as equals with radar systems engineers or designers this book will allow you to understand them to question them intelligently and perhaps to provide them with a perspective a dispassionate yet competent view that they lack If you are trained in another discipline but have been made the manager of a radar project or a system program that has one or more radars as subsystems this book will provide you with the tools you need not only to give your team members confidence but also to make a substantive technical contribution yourself

**Radar and Laser Cross Section Engineering** David C. Jenn, 2005 There have been many new developments in the ten years since the first edition of Radar and Laser Cross Section Engineering was published Stealth technology is now an important consideration in the design of all types of platforms The second edition includes a more extensive introduction that covers the important aspects of stealth technology and the unique tradeoffs involved in stealth design Prediction reduction and measurement of electromagnetic scattering from complex three dimensional targets remains the primary emphasis of this text developed by the author from courses taught at the Naval Postgraduate School New topics on computational methods like the finite element method and the finite integration technique are covered as well as new areas in the application of radar absorbing material and artificial metamaterials Matlab registered software homework problems and a solution manual available to instructors supplement the text Written as an instructional text this book is recommended for upper level undergraduate and graduate students introduction to the physics and mathematics of radar cross section in order to better understand the interdisciplinary aspects of stealth Matlab is a registered trademark of The MathWorks Inc

*Knowledge Based Radar Detection, Tracking and Classification* Fulvio Gini, Muralidhar Rangaswamy, 2008-07-31 Discover the technology for the next generation of radar systems Here is the first book that brings together the key concepts essential for the application of Knowledge Based Systems KBS to radar detection tracking classification and scheduling The book highlights the latest advances in both KBS and radar signal and data processing presenting a range of perspectives and innovative results that have set the stage for the next generation of adaptive radar systems The book begins with a chapter introducing the concept of Knowledge Based KB radar The remaining nine chapters focus on current developments and recent applications of KB concepts to specific radar functions Among the key topics explored are Fundamentals of relevant KB techniques KB solutions as they apply to the general radar problem KBS applications for the constant false alarm rate processor KB control for space time adaptive processing KB techniques applied to existing radar systems Integrated end to end radar signals Data processing with overarching KB control All chapters are

self contained enabling readers to focus on those topics of greatest interest Each one begins with introductory remarks moves on to detailed discussions and analysis and ends with a list of references Throughout the presentation the authors offer examples of how KBS works and how it can dramatically improve radar performance and capability Moreover the authors forecast the impact of KB technology on future systems including important civilian military and homeland defense applications With chapters contributed by leading international researchers and pioneers in the field this text is recommended for both students and professionals in radar and sonar detection tracking and classification and radar resource management
