Racism And Colonialism:

Racism and Colonialism R.J. Ross, 2012-12-06 1 REFLECTIONS ON A THEME by ROBERT ROSS This book the fourth in the series Comparative Studies in Overseas History and like its predecessors the product of a symposium held by the Leiden Centre for the History of European Expansion is organised around a single theme the relationship between the ideological structures of domination and oppression that have come to be called racism and the political and economic ones which grew out of Europe's conquering and ruling much of the rest of the world By racism we mean those systems of thought in which group characteristics of human beings of a non somatic nature are considered to be fixed by principles of descent and in which in general physical attributes other than those of sex are the main sign by which characteristics are attributed In addition almost by definition the systems of thought entailed in this require that there is a hierarchy of the various races and that those people in the lower ranks of that hierarchy are seriously disadvantaged at least if the proponents of racist thought are able to impose their will on the society in which they live The exclusion of the discrimination of women from the concept of racism should not be thought as entailing that racist and sexist ideas do not have much in common since both derive from essentially biological determinism and indeed 2 racist societies have historically almost invariably been strongly sexist

Racist Trademarks Malte Hinrichsen, 2012 Since the beginning of commodity culture products have been marketed with images reflecting racist concepts of otherness Using the prominent examples of three companies Uncle Ben's, Sarotti and Banania this book examines how racist trademark figures were established in the U S Germany and France and built on nation specific processes of racial stereotyping While it finds that the three figures mirror their national histories of slavery Orientalism and colonialism the book reveals that their paths through popular culture also followed strikingly similar patterns Conceived in an era of overt racism each symbol was challenged by social movements over the course of the 20th century and became increasingly marginalized in promotional activities In the early 2000s however all three figures were relaunched with supposedly new makeovers hitting once again at the heart of commodity culture and illustrating the subtle prevalence of racist stereotypes Series Racism Analysis Series A Studies Vol 3

Shakespeare, Race, and Colonialism Ania Loomba, 2002-09-05 For centuries plays like Othello and The Tempest have spoken about race to audiences whose lives have been and continue to be enormously affected by the racial question But are concepts such as race or racism xenophobia ethnicity or even nation appropriate for analysing communities and identities in early modern Europe Did skin colour matter to Shakespeare and his contemporaries or was religious difference more important to them This book examines how Shakespeare's plays contribute to and are themselves crafted from contemporary ideas about social and cultural difference It considers how such ideas might have been different from later ideologies of race that emerged during colonialism but also from older ideas about barbarism blackness and religious difference Thus it places the racial question in Shakespeare's plays alongside the histories with which they converse Shakespeare uses and plays with the vocabularies of difference prevailing in his time repeatedly turning to religious and cultural cross overs and conversions their impossibility or the traumas they engender or the social upheavals they can generate Shakespeare Race and Colonialism looks in depth at Othello The Merchant of Venice Antony and Cleopatra The Tempest and Titus Andronicus and also shows how racial difference shapes the language and themes of other plays
