The Voice Catchers Joseph Turow, 2021-05-18 Your voice as biometric data and how marketers are using it to manipulate you Only three decades ago it was inconceivable that virtually entire populations would be carrying around wireless phones wherever they went or that people's exact locations could be tracked by those devices We now take both for granted Even just a decade ago the idea that individuals' voices could be used to identify and draw inferences about them as they shopped or interacted with retailers seemed like something out of a science fiction novel Yet a new business sector is emerging to do exactly that The first in depth examination of the voice intelligence industry The Voice Catchers exposes how artificial intelligence is enabling personalized marketing and discrimination through voice analysis Amazon and Google have numerous patents pertaining to voice profiling and even now their smart speakers are extracting and using voice prints for identification and more Customer service centers are already approaching every caller based on what they conclude a caller's voice reveals about that person's emotions sentiments and personality often in real time In fact many scientists believe that a person's weight height age and race not to mention any illnesses they may have can also be identified from the sound of that individual's voice Ultimately not only marketers but also politicians and governments may use voice profiling to infer personal characteristics for selfish interests and not for the benefit of a citizen or of society as a whole Leading communications scholar Joseph Turow places the voice intelligence industry in historical perspective explores its contemporary developments and offers a clarion call for regulating this rising surveillance regime

such as a tag in your car or in a backpack. You can even securely and temporarily give an airline tracking info for an AirTag in your location so you know when it arrives with you at a destination or help them find it when it's gone astray. This book looks at the three different kinds of tracking available from Apple. People: Learn how to share your location safely, follow others who let you, and send and receive notifications about arrivals and departures. Also, prevent being tracked when you don't want to be. Devices: See the whereabouts of your and Family Sharing group members' devices and audio hardware. Get to know the ins and outs of enabling Find My and taking remote actions from playing a sound to wiping your data from a device. Items: Find out how AirTags make use of the crowdsourced network of other people's Apple devices to help you find a lost or forgotten purse, backpack, or even car, and about the many third-party devices licensing the technology from Apple. Learn how to share your items with up to five other people. While the book focuses on the latest Apple operating systems: iOS 16, iPadOS 16, macOS 14 Sonoma, and watchOS 10, it looks back as far as iOS 11, iPadOS 11, and macOS 10.15 Catalina for nearly every feature and sometimes back even years before those releases so you can best use your mix of Apple devices of all vintages. Get an overview into how Find My works. Turn on tracking on every device: iPhone, iPad, Mac, and Apple Watch. Find out the difference between device-based Find My tracking and the Find My network. Figure out whether your Apple or Beats audio hardware can be tracked just over Bluetooth nearby or also via the Find My Network. See the place in Apple's ecosystem for third-party Find My tracking from nearly a dozen companies that make bike bags and general stuff trackers, some with extra alarms. Understand Activation Lock, which protects devices from being reused even if someone has erased them, and Find My Lock, which keeps Find My items from being reset and taken over. Discover buried controls for configuring exactly how Find My updates your device's location, including when power runs low. Develop an understanding of your Apple Watch's three distinct Find My features to use them effectively on the go. Learn about sharing your location and that of your devices and items. Get to know presence, the way you define which of your devices indicates where you are to other people. Use Messages to share your location for an hour, a day, or indefinitely. Start sharing AirTags and other items with up to five other people. Learn how to share an AirTag or other Find My item with an airline to help them locate your baggage. Get help finding missing items and devices. Lost a single earbud? Apple may have you covered by playing a sound out of it or providing nearly pinpoint tracking. Experience the joy of playing a sound over the internet or nearby to help find a missing device or item. Learn about the capability to track an iPhone or iPad even after it's been erased. Help family members find lost and stolen gear through Find My's Family Sharing support. Understand how to use Precision Tracking when you're close to a missing object. Be alerted to and block unwanted tracking. Learn about Apple's efforts and those of the broader industry to prevent Find My from being used for stalking and unwanted tracking. Spot Google and Apple trackers near you or traveling with you that aren't yours and aren't Apple Find My items shared by others with you, including audio alerts and warnings on your iPhone, iPad, or an Android device. Control and monitor the way you let others track your whereabouts.
