Models and Simulations of the Electric Field in Deep Brain Stimulation Fabiola Alonso, 2018-09-10 Deep brain stimulation DBS is an established surgical therapy for movement disorders such as Parkinson's disease PD and essential tremor ET A thin electrode is implanted in a predefined area of the brain with the use of stereotactic neurosurgery In the last few years new DBS electrodes and systems have been developed with possibilities for using more parameters for control of the stimulation volume In this thesis simulations using the finite element method FEM have been developed and used for investigation of the electric field EF extension around different types of DBS lead designs symmetric steering and stimulation modes voltage current The electrode surrounding was represented either with a homogeneous model or a patient specific model based on individual preoperative magnetic resonance imaging MRI The EF was visualized and compared for different lead designs and operating modes In Paper I the EF was quantitatively investigated around two lead designs 3389 and 6148 simulated to operate in voltage and current mode under acute and chronic time points following implantation Simulations showed a major

impact on the EF extension between postoperative time points which may explain the clinical decisions to change the stimulation amplitude weeks after implantation In Paper II the simulations were expanded to include two leads having steering function 6180 Surestim1 and patient specific FEM simulations in the zona incerta It was found that both the heterogeneity of the tissue and the operating mode influence the EF distribution and that equivalent contact configurations of the leads result in similar EF The steering mode presented larger volumes in current mode when using equivalent amplitudes Simulations comparing DBS and intraoperative stimulation test using a microelectrode recording MER system Paper III showed that several parallel MER leads and the presence of the non active DBS contacts influence the EF distribution and that the DBS EF volume can cover but also extend to other anatomical areas Paper IV introduces a method for an objective exploitation of intraoperative stimulation test data in order to identify the optimal implant position in the thalamus of the chronic DBS lead Patient specific EF simulations were related to the anatomy with the help of brain atlases and the clinical effects which were quantified by accelerometers The first results indicate that the good clinical effect in ET is due to several structures around the ventral intermediate nucleus of the thalamus

Residential Electrician Field Guide

Jesse Kuhlman,2021-07-01 This guide book started out as a simple code basics guide for my own employees at Kuhlman Electric in Massachusetts and New Hampshire I was finding that when we wired a detached garage or something else we didn't do all the time there would be some confusion on how to do it properly what the codes were etc I'm all about training at my own company and came up with a guide that would cover all these situations My employees could keep it in their trucks and pull it out when needed For example if they were going to install a Tesla charger next week they could reference the section in this guide book to refresh their memory This early company guide morphed into Residential Electrician Field Guide This guide includes many of the important residential codes explained in a normal non lawyer talk way One of the most frustrating things about our National Electrical Code book is that it is hard to read My goal was to break down the codes and explain them in simplest fashion possible This guide is over 200 pages including over 75 diagrams and tables Some of the items included in this guide NEC 2020 code changes Under ground wiring Detached garage wiring New work and old wiring wiring installations Arc Fault protection GFCI protection Related codes to lighting and outlets throughout all different rooms in a house EV charger installations Service upgrade installations Load Calculations Knob and tube inspections HVAC wiring Cable and CAT lines My thoughts on electrical inspectors Massachusetts Amendments to the 2020 NEC Some business thoughts And much much more If you are a residential electrician or someone interested in it I believe this to be the perfect guide for you
