reader is left to determine for himself how this type of programming will work under conditions other than those for which the authors developed and applied it Briefly the conditions for the original development and application of SNAP programming were 1 students were to learn how to troubleshoot a new radar system 2 students had prior training and experience with similar radars 3 programmers had varying but generally high degrees of familiarity with the course content and 4 course material was derived from a task analysis which insured the relevance of the course content to the student s ultimate task Author
