University Rankings William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of higher education and presents basic information on higher education in Taiwan The author develops a four dimensional framework for the analysis of the ranking phenomenon in the island state First the technological ecological dimension aims to look into how the rankings have impacted Taiwan s higher education based on empirical findings from five Taiwanese public universities Next the technological geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education The two conceptual dimensions focus on the relationship between the rankings and power in higher education They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives From an ecological perspective the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy Geographically while the empirical analysis is based on data from Taiwan the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia

Global University Ranking Systems: Methodologies, Impact, and Repercussions Kayyali, Mustafa, 2025-10-15

Global university ranking is a powerful tool in shaping the higher education landscape and influencing student decisions. These rankings develop various methodologies that assess academics, faculty, and research to offer a comparative framework to evaluate an institution. This growing prominence, however, has sparked debate about their accuracy and equity with marginalized and diverse educational missions. Global ranking systems analyze their broad impact on universities and stakeholders and critically examine their long-term repercussions for higher education.

Global University Ranking Systems: Methodologies, Impact, and Repercussions explores the intricate world of global university rankings and their profound impact. This book determines how rankings shape global perceptions, determining which universities gain international prestige and which struggle to maintain relevance. Covering topics such as higher education rankings and education, this book is an excellent resource for administrators, faculty, policymakers, researchers, academicians, and more.

Global University Rankings and the Politics of Knowledge Michelle Stack, 2021-06-17. For many institutions, to ignore your university's ranking is to become invisible, a risky proposition in a competitive search for funding. But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university. Drawing on a range of research and inquiry-based methods, *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact. Conceptually unique in its scope, *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems. Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education. Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media-driven rankings. This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics, culture, and the economy to explore how assumptions about gender, social class, sexuality, and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive, environmental, and social injustice.

Influence of University Rankings on Institutions: Ethics, Controversies, and Competition Kayyali, Mustafa, 2025-10-16. The influence of university rankings on higher education institutions reveals ethical concerns, controversies, and increased global competition. As rankings become a measure of academic prestige, many universities align their strategies with ranking criteria, sometimes at the expense of educational values. This pursuit of higher rankings often drives institutions to invest in research output and international visibility while potentially neglecting teaching quality or community engagement. Criticisms emerge over the transparency and fairness of ranking methodologies, raising questions about their validity and the consequences they produce. Further exploration into the ethical implications of rankings may reveal new contentious practices and competitive dynamics shaped by the prioritization of university rankings.

Influence of University Rankings on Institutions: Ethics, Controversies, and Competition explores how

the pursuit of higher university rankings influences institutional priorities behaviors and decision making processes It examines the ethical dilemmas methodological controversies and competitive pressures that arise from global ranking systems This book covers topics such as mental health teacher education and ethics and bias and is a useful resource for educators policymakers government officials psychologists academicians researchers and scientists Documents, Including Messages and Other Communications Ohio,1895 Annual Report of the Department of Inspection of Workshops, Factories and Public Buildings, to the General Assembly of the State of Ohio, for the Year ...
