A Research Agenda for Geographic Information Science at the United States Geological Survey National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Mapping Science Committee, Committee on Research Priorities for the USGS Center of Excellence for Geospatial Information Science, 2007-10-26 Comprehensive and authoritative baseline geospatial data content is crucial to the nation and to the U.S. Geological Survey USGS The USGS founded its Center of Excellence for Geospatial Information Science CEGIS in 2006 to develop and distribute national geospatial data assets in a fast moving information technology environment In order to fulfill this mission the USGS asked the National Research Council to assess current GIScience capabilities at the USGS identify current and future needs for GIScience capabilities recommend strategies for strengthening these capabilities and for collaborating with others to maximize research productivity and make recommendations regarding the most effective research areas for CEGIS to pursue With an initial focus on improving the capabilities of The National Map the report recommends three priority research areas for CEGIS information access and dissemination data integration and data models and further identifies research topics within these areas that CEGIS should pursue To address these research topics CEGIS needs a sustainable research management process that involves a portfolio of collaborative research that balances short and long term goals

The Neighborhood in the Internet John M. Carroll, 2014-07-30 Today community seems to be everywhere At home at work and online the vague but comforting idea of the community pervades every area of life But have we lost the ability truly to understand what it means The Neighborhood in the Internet investigates social and civic effects of community networks on local community and how community network designs are appropriated and extended by community members Carroll uses his conceptual model of community to re-examine the Blacksburg Electronic Village the first Web based community network applying it to attempts to sustain and enrich contemporary communities through information technology The book provides an analysis of the role of community in contemporary paradigms for work and

other activity mediated by the Internet It brings to the fore a series of design experiments investigating new approaches to community networking and addresses the future trajectory and importance of community networks This book will be of interest to students of sociology community psychology human computer interaction information science and computer supported collaborative work **Mass Collaboration and Education** Ulrike Cress,Johannes Moskaliuk,Heisawn Jeong,2016-02-08 Mass collaboration on Internet platforms like Wikipedia and Scratch along with wider movements like the maker space and citizen science are poised to have profound impacts on learning and education Bringing together researchers from such fields as psychology education information technology and economics the book offers a comprehensive overview of mass collaboration novel cross disciplinary theoretical accounts and methodological approaches for studying and improving these massively collaborative enterprises The book is aimed to serve as an information source for researchers educators and designers of platforms and learning environments *Mapping and the Citizen Sensor* Giles Foody,Linda See,Steffen Fritz,Peter Mooney,Ana-Maria Olteanu-Raimond,Cidália Costa Fonte,Vyron Antoniou,2017-09-11 Maps are a fundamental resource in a diverse array of applications ranging from everyday activities such as route planning through the legal demarcation of space to scientific studies such as those seeking to understand biodiversity and inform the design of nature reserves for species conservation For a map to have value it should provide an accurate and timely representation of the phenomenon depicted and this can be a challenge in a dynamic world Fortunately mapping activities have benefitted greatly from recent advances in geoinformation technologies Satellite remote sensing for example now offers unparalleled data acquisition and authoritative mapping agencies have developed systems for the routine production of maps in accordance with strict standards Until recently much mapping activity was in the exclusive realm of authoritative agencies but technological development has also allowed the rise of the amateur mapping community The proliferation of inexpensive and highly mobile and location aware devices together with Web 2 0 technology have fostered the emergence of the citizen as a source of data Mapping presently benefits from vast amounts of spatial data as well as people able to provide observations of geographic phenomena which can inform map production revision and evaluation The great potential of these developments is however often limited by concerns The latter span issues from the nature of the citizens through the way data are collected and shared to the quality and trustworthiness of the data This book reports on some of the key issues connected with the use of citizen sensors in mapping It arises from a European Co operation in Science and Technology COST Action which explored issues linked to topics ranging from citizen motivation data acquisition data quality and the use of citizen derived data in the production of maps that rival and sometimes surpass maps arising from authoritative agencies **Atlas of Knowledge** Katy Borner,2015-03-20 The power of mapping principles for visualizing knowledge illustrated by many stunning large scale full color maps Maps of physical spaces locate us in the world and help us navigate unfamiliar routes Maps of topical spaces help us visualize the extent and structure of our collective knowledge they reveal bursts of

activity pathways of ideas and borders that beg to be crossed This book from the author of Atlas of Science describes the power of topical maps providing readers with principles for visualizing knowledge and offering as examples forty large scale and more than 100 small scale full color maps Today data literacy is becoming as important as language literacy Well designed visualizations can rescue us from a sea of data helping us to make sense of information connect ideas and make better decisions in real time In Atlas of Knowledge leading visualization expert Katy Bruner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis Drawing on fifteen years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the Atlas features striking and enlightening new maps from the popular Places Spaces Mapping Science exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science

Angels and Other Cows Petra Ahrweiler, 2024-06-29 This open access novel uses fantasy and romance to pique readers interest in understanding how AI technologies can be used for social justice across very different political and social terrains Can you truly reach out to somebody who is in every aspect the direct opposite of yourself Gabriel and Tilda the two protagonists of this futuristic novel are very different people They work at a Berlin based international aid company and the only thing they can agree on is that the world is in a shambles Scarce public resources conflict and crises inequalities religious and socio cultural belief systems that cement social injustice have created a world as deeply divided and set apart as Gabriel and Tilda They are sent on company business to recruit international partners for a social development project on global justice and start travelling the world together On their adventurous journey through many countries they learn about the impacts of culture on social welfare systems while trying to define their own relationship which is intermingled with generational power games and milieu specific worldview struggles In Gabriel and Tilda s attempts to bridge the deep gulf between their personalities the novel creates a metaphor for finding a cohesive model of global justice using artificial intelligence that can integrate highly contextualized national value cultures Gabriel and Tilda are supported by two guardian angels Assigned to save the planet through interpersonal and intercultural integration the angels GA and TA team up with English Benedictine monk and mystic guru Bede Griffiths who is very keen to help Tilda and Gabriel in their model pilot of unlikely love
