Researching Subtitling Processes Anke Radinger, 2025-07-31 Subtitling is almost as old as the motion picture itself. It is a very specific form of translation that goes well beyond the transferring of written texts given that the source text the film is a complex combination of spoken and written text together with dynamic images, music and sounds. But how does one read a film in order to translate it? In this volume, Anke Radinger investigates what happens in a subtitler's mind, especially in various working environments. An example of one of these conditions is the introduction of innovative assistive language tools such as AI-powered speech-to-text into traditional subtitling workflows. Using methods like eye tracking and keylogging, Radinger reviews computer or rather AI-assisted subtitling processes, practices and workflows while concentrating on aspects such as effort and quality. Her work is a valuable contribution to subtitling process research. SPR, a young and greatly under-researched subfield of audiovisual translation.

Introducing Audiovisual Translation Agnieszka Szarkowska, Anna Jankowska, 2024-09-30 This user-friendly textbook offers comprehensive insights into all facets of audiovisual translation and media localisation. Serving as a comprehensive guide spanning seven chapters, it begins by introducing audiovisual translation (AVT). It goes on to explore the historical backdrop and highlights the distinctions from traditional written text translation. The authors expertly navigate you through the primary AVT modalities: interlingual subtitling, dubbing, voice-over, subtitling for the deaf and hard of hearing, live subtitling, and audio description. A blend of theoretical concepts and practical, real-world examples in various languages ensures a seamless understanding of the fundamental principles of AVT. The book clearly guides you through the most important aspects of each type of AVT. Designed for those exploring various AVT forms, budding audiovisual translators, and those interested in contemporary AVT trends and research, this book is an invaluable resource for students of translation and linguistics and for educators in AVT across higher education and media localisation programmes.

Untertitel im Kinderfernsehen Maria Wünsche, 2022-07-22 Intralinguale Untertitel sind in Deutschland seit den 1980er Jahren aus dem öffentlich-rechtlichen Fernsehen bekannt. Eine besondere Herausforderung sind Untertitel für Kinder, vor allem da Letztere noch Lesen lernen. Das Lesen von Untertiteln verlangt von Kindern folglich oft eine größere Anstrengung als von Erwachsenen. Werden sie von dieser heterogenen Zielgruppe dennoch als Hilfsmittel positiv angenommen? Maria Wünsche hat die Verständlichkeit untertitelter Sendungen in einer Studie mit 150 Kindern zwischen acht und zwölf Jahren untersucht. Bei der Auswertung verknüpft sie Perspektiven aus Translations- und Sozialwissenschaften sowie der Verständlichkeitsforschung und benennt relevante Verständlichkeitsfaktoren für untertitelte Kommunikate. Das Ergebnis sind wichtige Erkenntnisse dazu, wie Untertitel für gebörliche und lautsprachlich orientierte Kinder mit einer Hörbehinderung gestaltet werden sollten, um eine größtmögliche Verständlichkeit zu gewährleisten.
