The Labour Politics of App-Based Driving in Vietnam Joe Buckley, 2023-10-19 Over the past decade app based driving services like ride hailing and delivery have become an integral part of business employment and daily life in Vietnam This growth however has been accompanied by tensions and conflicts between ride hailing platforms and traditional taxi companies xe m motorbike taxi drivers the authorities and the drivers working for these platforms Most drivers on these services are male and work long hours for low wages Their working conditions are precarious because platforms classify them as partners rather than employees denying them basic rights and benefits Although platforms offer bonuses organize events to celebrate drivers contributions and provide training courses these do not address the fundamental exploitation in the employment relationship The Ministry of Labour Invalids and Social Affairs MOLISA has not taken sufficient action to protect drivers or taken a stance on whether they should be classified as contractors or employees The Vietnam General Confederation of Labour VGCL is working towards securing social protection for drivers and increasing their representation in labour associations While some members of the VGCL have argued that app based drivers are actually workers and should be afforded the same rights and benefits as all workers this is as yet not the formal position of the confederation Drivers have taken to organizing strikes and protests to demand better treatment from the platforms Their methods of activism are rooted in both traditional Vietnamese labour activism and global trends of platform protest The emergence of the gig economy in Vietnam is a challenge to sustainable development Policymakers and practitioners are called upon to ensure that platform work contributes to improved livelihoods and decent lifestyles for all

Philippa Ryan,2019-05-30 In digital economies the Internet enables the platformisation of everything Big technology companies and mobile apps are running mega marketplaces supported by seamless online payments systems This rapidly expanding ecosystem is fueled by data Meanwhile perceptions of the global financial crisis data breaches disinformation and the manipulation of political sentiment have combined to create a modern trust crisis A lack of trust constrains commerce particularly in terms of consumer protection and investment Big data artificial intelligence automated algorithms and blockchain technology offer new solutions and risks Trust in our legal systems depends on certainty consistency and enforceability of the law However regulatory and remedial gaps exist because the law has not kept up with technology This work explores the role of competency and good faith in the creation of social and legal relationships of trust and the need for governance transparency and human accountability to combat distrust particularly in digital economies **Jahresbericht**
