Remarkable Mathematicians Ioan Mackenzie James, 2002

Remarkable Mathematicians Ioan James, 2003-02-06

Ioan James introduces and profiles sixty mathematicians from the era when mathematics was freed from its classical origins to develop into its modern form. The subjects all born between 1700 and 1910 come from a wide range of countries and all made important contributions to mathematics through their ideas, their teaching and their influence. James emphasizes their varied life stories, not the details of their mathematical achievements. The book is organized chronologically into ten chapters, each of which contains biographical sketches of six mathematicians. The men and women James has chosen to portray are representative of the history of mathematics such that their stories when read in sequence convey in human terms something of the way in which mathematics developed. Ioan James is a professor at the Mathematical Institute, University of Oxford. He is the author of *Topological Topics* (Cambridge, 1983), *Fibrewise Topology* (Cambridge, 1989), *Introduction to Uniform Spaces* (Cambridge, 1990), *Topological and Uniform Spaces* (Springer Verlag, New York, 1999) and co-author with Michael C. Crabb of *Fibrewise Homotopy Theory* (Springer Verlag, New York, 1998). James is the former editor of the London Mathematical Society Lecture Note Series and volume editor of numerous books. He is the organizer of the Oxford Series of Topology symposia and other conferences and co-chairman of the Task Force for Mathematical Sciences of Campaign for Oxford.

Remarkable Mathematician: From Euler To Von Neumann JAMES, Ioan James introduces and profiles sixty mathematicians from an era which saw mathematics freed from its classical origins to develop into its modern form. The characters all born between 1700 and 1910 come from a wide range of countries and all made an important contribution to mathematics through their ideas, their teaching, their influence and so on. The book is organised chronologically into ten chapters, each of which contains potted life stories of six mathematicians. The players James has chosen to portray are sufficiently representative that their stories when read in sequence convey in human terms something of the way in which mathematics developed. **Math Makers: The Lives and Works of 50 Famous Mathematicians** Alfred S. Posamentier, Christian Spreitzer, 2024-11-20 Discover the captivating stories behind the greatest minds in mathematics. Mathematics today is the fruit of centuries of brilliant insights by men and women whose personalities and life experiences were often as extraordinary as their mathematical achievements. This entertaining history of mathematics chronicles those achievements through 50 short biographies that bring these great thinkers to life while making their contributions understandable to the masses. Among the fascinating characters profiled are Isaac Newton (1642-1727), the founder of classical physics and infinitesimal calculus; he frequently quarrelled with fellow scientists and was obsessed with alchemy and arcane Bible interpretation. Sophie Germain (1776-1831), who studied secretly at the cole Polytechnique in Paris using the name of a previously enrolled male student; she is remembered for her work on Fermat's Last Theorem and on elasticity theory. and Srinivasa Ramanujan (1887-1920), who came from humble origins in India and had almost no formal training yet made substantial contributions to mathematical analysis.
