Remarriage In The Middle Years And Beyond:

The Middle Years: Neither Too Young Nor Too Old A. J. Jaffe, 1971 **Examining the Experiences of Later-life Remarried Couples** Sara B. Dupuis, 2009 *Remarriage and Stepparenting* Kay Pasley, Marilyn Ihinger-Tallman, 1987-10-05 Since the mid 1970 s the texture of modern society has been changed dramatically by the increasing presence of the stepfamily No longer considered the exception to the norm the stepfamily has been thrust into the mainstream by a 50% divorce rate combined with a high incidence of remarriage According to some estimates 35% of children born in the 1980 s will experience stepfamily living by the time they reach the age of 18 Although interest in remarriage and stepfamily relationships is growing the literature often takes the form of popular work or anecdotal accounts with minimal data This volume provides a much needed overview of current research and theory in the field It stems from a series of meetings sponsored by the Society for Research in Child Development and funded by the Foundation for Child Development The nine scholars who participated in the year long study group along with two others prominent in the field have produced a work which explores the intricacies of remarriage and stepfamily living from a variety of perspectives How do divorce and remarriage determine parent s adjustment and parent child relationships How are the boundaries set within this new family form What are the dynamics between biological and step parents both within the newly created nuclear family and within the linked family units those tied together for life by their common children This comprehensive volume sheds new light on these issues and more including the relatively untouched area of stepsibling relationships It incorporates findings from five recent research studies providing data not available elsewhere The contributors also examine the stepfamily within historical social and cultural contexts from changing demographics to stepfamily stereotypes They cast a critical eye on current literature in the field and on research methodologies providing insights on the changing nature of the stepfamily and developing conceptual frameworks for further research With so much important up to date scholarship under one cover REMARRIAGE AND STEPPARENTING TODAY is a valuable resource for researchers and clinicians in the areas of sociology psychology psychiatry and social work as well as for advanced students pursuing any of these disciplines **The Missionary Review of the World** ,1898 **Missionary Review of the World** ,1898 *Remarriage* Phyllis Kamm, 1991 *Christian Missions and Social Progress* James Shepard Dennis, 1899 *Decisions of the Department of the Interior in Appealed Pension and Retirement Claims, Also a Table of Cases Reported, Cited, Distinguished, Modified, and Overruled and of Statutes Cited and Construed* United States. Department of the Interior, 1897 *Adolescents and Their Families* Richard M. Lerner, Domini R. Castellino, 2013-12-02 First published in 1999 The adolescent period is marked by changes in the biological psychological cognitive and social dimensions of the individual as well as by changes in the adolescents multilevel context i e the peers family school and other institutions in his or her ecology Adolescence is a dynamic period one which exemplifies the importance of understanding the relations between the developing individual and his or her changing context

The articles included in this volume represent the current range of scholarship pertaining to adolescents and their families and exemplify the use of such an approach. The articles underscore the continual importance of the family across adolescence.

The Oxford Encyclopedia of Women in World History Bonnie G. Smith, 2008. The *Encyclopedia of Women in World History* captures the experiences of women throughout world history in a comprehensive 4 volume work. Although there has been extensive research on women in history by region, no text or reference work has comprehensively covered the role women have played throughout world history. The past thirty years have seen an explosion of research and effort to present the experiences and contributions of women not only in the Western world but across the globe. Historians have investigated women's daily lives in virtually every region and have researched the leadership roles women have filled across time and region. They have found and demonstrated that there is virtually no historical social or demographic change in which women have not been involved and by which their lives have not been affected. The *Oxford Encyclopedia of Women in World History* benefits greatly from these efforts and experiences and illuminates how women worldwide have influenced and been influenced by these historical social and demographic changes. The *Encyclopedia* contains over 1,250 signed articles arranged in an A-Z format for ease of use. The entries cover six main areas: biographies, geography and history, comparative culture and society, including adoption, abortion, performing arts, organizations and movements such as the Egyptian Uprising and the Paris Commune, women's and gender studies, and topics in world history that include slave trade, globalization, and disease. With its rich and insightful entries by leading scholars and experts, this reference work is sure to be a valued go-to resource for scholars, college and high school students, and general readers alike.

Love in the Later Years James Alfred Peterson, Barbara P. Payne, Barbara Payne, 1975. *The World Who's Who of Women*, 1992. *Women in Midlife* Grace Baruch, 2012-12-06. The Study of Women in Midlife GRACE K. BARUCH AND JEANNE BROOKS GUNN. To describe the middle years that relatively long span when one is neither young nor old as a neglected period may no longer be accurate given current scientific and popular interest in adult development and aging. But midlife is still too often seen merely as a kind of staging area on the way to old age when one gathers one's forces and tries to stock up on assets: health, money, relationships that will be needed for the rigors of the last phase of life. The middle years have been characterized more as a transition period than as a time of growth, satisfaction, and creativity. As this volume will show, although midlife is not without its difficulties, it is for many women a time of unexpected pleasure, even power.

MAJOR THEMES A central theme of this volume is the impact of social change. The influence of economic conditions, of ideology, of the normative timing of such life events as age of marriage and childbearing are addressed in many chapters from many different perspectives. Social changes are shown to have both negative and positive consequences. On the negative side, for example, the sex differential in life expectancy is a biosocial phenomenon that greatly restricts the availability of sexual partners, or more precisely, heterosexual partners for older women.

Middle and Late Life Transitions Felix M. Berardo, 1982. The articles in this volume reflect a

reorientation in the ways that scientists have viewed human growth and development In this new perspective transitions are viewed as normal situations that are likely to confront anyone Whatever the situation each transition encompasses a bridging period often characterized by feeling of uncertainty and instability During this interval the person engages in various degrees of social and psychological adaptations to the changing situations in his or her life While such transitional processes have long been characteristic of the human condition it is only in recent years that social and behavioral scientists have begun to rectify out limited knowledge concerning how people and families negotiate a wide array of mid and late life transitions The current preoccupation with the transitions of middle and old age has evolved from several historical economic and demographic changes that have combined to shift our populations toward the middle of the age structure and have produced new stages in the life cycle The result is that today most Americans can expect to pass through these new stages including long term survival the empty nest period universal retirement and an extended term of widowhood in late life characterized by solitary living Many of these changes have in common that they involve periods of imbalance often accompanied by strong emotions Lives must be restructured adaptations made and modifications in both mental and physical behavior must occur The descriptions of these transitions and the process by which adaptations to them are made are the subjects of the articles in this issue
