## Role of remittances in Tongan economy

### Abstract

Inward remittances have been a great support to Pacific Island Countries, including Tonga. Aside from being a major source of foreign exchange earnings, they supplement domestic savings and real resources. This paper examines the role of remittances in the economic growth of Tonga's during a 28 year period (1981-2007).

**Keywords:** Remittances, economic growth, financial sector development, bounds test, Tonga.

### Introduction

Inward remittances are important for Pacific Island Countries (PICs)<sup>1</sup>, notably for Samoa and Tonga (World Bank 2006). Despite the indications of a world-wide decline in remittance flows due to the current global recession, a report by Asian Development Bank (Asian Development Bank 2009) was more optimistic. It was expected that the implementation of a scheme of temporary work-permits for unskilled farm labour from PICs for fruit picking in the two advanced countries in the region, Australia and New Zealand would ensure a steady source of remittance inflows to PICs.

With increased financial sector development and spread of banking facilities in PICs, a larger proportion of remittances are likely to be kept in interest earning deposits than before. Remittance receipts, thus entering the system through banking channels promote financial intermediation. The paper seeks to investigate the relationship between economic growth and remittances in Tonga, with particular reference to interaction between remittances and financial sector development.

### Trends in remittances in Tonga

Table 1 presents the remittances received by PICs, in absolute amounts (US Dollars) as well as in percentages of their respective gross domestic products (GDPs). Amongst PICs, Tonga's annual remittance inflows over the past three decades averaged about 35 per cent of GDP. Further, Tonga is one of the two PICs which figured in the list of world's top 10 remittance receiving countries in 2007 and 2008 (World Bank 2009b).
