Roots And Patterns Hebrew Morphosyntax

Mark Steyvers

Roots And Patterns Hebrew Morphosyntax:

Roots and Patterns Maya Arad, 2005-07-15 In depth investigation of Hebrew verb morphology in light of cutting edge theories of morphology and lexical semantics An original theory about the semantic content of roots An account of how roots function in word formation A wide empirical basis containing a complete corpus of verb creating roots in Hebrew

Icelandic Morphosyntax and Argument Structure Jim Wood, 2015-01-05 This book provides a detailed study of Icelandic argument structure alternations within a syntactic theory of argument structure Building on recent theorizing within the Minimalist Program and Distributed Morphology the author proposes that much of what is traditionally attributed to syntax should be relegated to the interfaces and adapts the late insertion theory of morphology to semantics The resulting system forms sound meaning pairs by generating hierarchical structures that can be translated into morphological representations on the one hand and semantic representations on the other The syntactic primitives however underdetermine both morphophonology and semantics Without appealing to special stipulations the theory derives constraints on the external argument of causative alternation verbs interpretive restrictions on nominative objects and the optionally agentive interpretation of verbs denoting self directed motion

The Morphosyntax of Gender Ruth T. Kramer, 2015 This book presents a new approach to gender and its effects on morphosyntax Using data from genetically diverse languages such as Amharic Somali and Romanian it provides one of the first large scale cross linguistically oriented theoretical approaches to the word and sentence structure effects of gender

Current Issues in Syntactic Cartography Fuzhen Si, Luigi Rizzi, 2021-10-15 This book illustrates recent developments in cartographic studies seen from a comparative perspective The different chapters explore various aspects of theoretical and descriptive syntax bearing on such topics as selection causativity binding light verb constructions the structure of the high and low peripheral zones Syntactic issues in the study of dialects and ancient languages are also addressed The languages investigated include French Hebrew Standard Dutch and the Ghent dialect Etruscan Japanese English Arabic Mandarin Chinese and the Teochew dialect The intended readers of this book include researchers and students working on natural language syntax the interface between syntax and semantics pragmatics and comparative and typological linguistics as well as scholars interested in particular languages such as East Asian and Romance languages

Structuring Sense: Volume III: Taking Form Hagit Borer, 2013-10 Hagit Borer develops a new model of word formation arguing that on the one hand the basic building blocks of language are rigid semantic and syntactic functions while on the other hand they are roots which in themselves are but packets of phonological information and are devoid of both meaning and grammatical properties of any kind

MIT Working Papers in Linguistics, 2005 **Morphosyntactic Development in Child Emirati Arabic** Dimitrios Ntelitheos, 2024-09-23 This book investigates selected aspects of the grammatical development of Emirati Arabic the variety of Gulf Arabic spoken in the United Arab Emirates and closely related to the varieties spoken in the rest of the Gulf States While the acquisition of Arabic

as a second language has been widely studied first language acquisition of different Arabic dialects has received much less attention Ntelitheos addresses this disparity by presenting a number of systematic studies on the acquisition of Emirati Arabic grammar based on a two year longitudinal corpus of six children He discusses the acquisition of the nominal domain including definiteness and possession the acquisition of verbal functional structure and agreement and the acquisition of word order and negation in the syntactic domain In addition he defines several developmental stages for Emirati Arabic based on established diagnostic tests The discussion is framed within a general survey of the relevant literature in Arabic acquisition studies and combines new empirical data with rigorous discussion of several long standing theoretical problems in the broader field of child language development *Elenchus of Biblica* ,2005 **Definite Markers, Phi-features, and Agreement** Ruth Kramer,2009 *States, Changes of State, and the Monotonicity Hypothesis* Andrew Koontz-Garboden,2007 **Architecture of the Palauan Verbal Complex** Justin Nuer,2010 Composition and Locality Vera Gribanova,2010 **Journal of Linguistics** ,2015 Copular Sentences in Russian Asya Pereltsvaig,2007-04-06 This book provides a detailed study and a novel Minimalist account of copular sentences in Russian focusing on case marking alternations nominative vs instrumental and drawing a distinction between two types of copular sentences On the assumption that Merge is defined in the simplest way possible it is argued that not all syntactic structures are a nti symmetrical One of the copular sentence types is analyzed as a poster child for symmetrical structures while the other type is treated as asymmetrical The originality of this study lies in treating the copula in the two types of copular sentences neither as completely identical nor as two distinct lexical items instead the two types of copula are derived through the process of semantic bleaching Furthermore it is argued that the two types of the copula need to combine with post copular phrases of different categories It is concluded that Russian draws a distinction between saturated DPs and unsaturated NPs in spite of its renowned lack of overt articles **NELS** North Eastern Linguistic Society. Meeting,2007 **Proceedings of the North East Linguistic Society 37** Emily Elfner,Martin Walkow,2007 NELS 37 the thirty seventh annual meeting of the North East Linguistic Society was hosted by the University of Illinois at Urbana Champaign on October 13 15 2006 These two volumes of conference proceedings edited by Emily Elfner and Martin Walkow and published by the Graduate Linguistic Student Association of the University of Massachusetts at Amherst contain the forty seven presented papers that were submitted for publication Volume 1 this volume contains papers from the special sessions on the Phonology and Morphology of Pidgins and Creoles and Syntactic Theory and Psycholinguistics as well eighteen papers from the main session *Proceedings of NELS*. North Eastern Linguistic Society. Meeting,2006 **Language** ,2008 **Глаголы движения в воде** Тимур Анатольевич Майсак,Екатерина В. Рахилина,2007 Status Report on Speech Research ,1994
