## **Chatgpt Scholarships In The Us:**

**Reimagining African Scholarship** Francis B. Nyamnjoh, 2025-04-21 This book reimagines African scholarship by challenging the enduring influence of Eurocentric paradigms and advocating for a decisive shift towards decolonised knowledge production. It introduces the concept of convivial scholarship, an inclusive framework that embraces the inherent incompleteness of knowledge, the dynamism of mobility, and the power of collaboration across diverse perspectives. The collection provides a comprehensive examination of the African scholarly and publishing landscape, celebrating the voices and intellectual traditions that have often been marginalised. From analysing the complex politics of knowledge production to exploring the future of African publishing in the digital age, this book envisions and inspires a more equitable, dynamic, and transformative future for African thought.

**Dialogues on Human Enhancement** Nicholas Agar, 2023-09-14 We face an emerging range of technologies that can be applied to our human natures with the goal of enhancing us. There are nootropic smart drugs and gene editing that influence the development of the brain. The near future promises cybernetic technologies that can be grafted onto our brains and bodies. The challenge for readers of *Dialogues on Human Enhancement* is to decide how to respond to these and other coming enhancement technologies. As you read these dialogues, you will meet passionate advocates for a variety of responses to enhancement tech, ranging from blanket rejection to ecstatic endorsement. You'll encounter Olen, for whom there is no such thing as too much enhancement. You'll meet Winston, a bioconservative who fiercely but also imaginatively opposes any human enhancement. And there is the moderate Eugenie, who strives to distinguish between enhancement technologies that should and should not be accepted. As these characters philosophically engage with each other, they will benefit from the supervisory presence of Sophie, the philosopher. *Dialogues on Human Enhancement* does not arrive at a single conclusion. Olen's transhumanism, Eugenie's moderation, and Winston's bioconservatism are presented as viable and necessary views as we enter a future made uncertain by human enhancement tech. And the book also welcomes the voices of students, even and especially if they challenge the opinions of our age's experts. As students join the conversations in this book, they will formulate their own views about how humanity could or should be in our Age of Human Enhancement.

**AI and Authorship in Scholarly Communication** Heather Moulaison-Sandy, 2025-05-16 *AI and Authorship in Scholarly Communication* explores the role of artificial intelligence (AI) as it pertains to scholarly research and writing. Explaining what AI is and how it can be used by scholars, the book also focuses on aspects with the potential to change the scholarly communication landscape. Bringing together research on AI and writing from the scholarly literature in LIS and beyond, the book weaves together information about essential topics relating to AI and authorship. In laying out the primary concerns surrounding AI in the field of scholarly communication, Moulaison-Sandy considers how those concerns map to norms and practices in research and writing. The book likewise explores the future landscape of scholarly communication, an environment in which AI will continue to play an important role. *AI and Authorship*

in Scholarly Communication will be of great interest to scholars students and practitioners and will be particularly useful to those studying AI or authorship from a library and information science LIS perspective Researchers or practitioners working in higher education or with learning technologies will also find much to interest them within the pages of the book
