Prosperity Todd G. Buchholz, 2016-06-07 In this bold history and manifesto a former White House director of economic policy exposes the economic political and cultural cracks that wealthy nations face and makes the case for transforming those same vulnerabilities into sources of strength and the foundation of a national renewal America and other developed countries including Germany Japan France and Great Britain are in desperate straits The loss of community a contracting jobs market immigration fears rising globalization and poisonous partisanship the adverse price of unprecedented prosperity are pushing these nations to the brink Acclaimed author economist hedge fund manager and presidential advisor Todd G Buchholz argues that without a sense of common purpose and shared identity nations can collapse The signs are everywhere Reckless financial markets encourage people to gamble with other people s money A coddling educational culture removes the stigma of underachievement Community traditions such as American Legion cookouts and patriotic parades are derided as corny or jingoistic Newcomers are watched with suspicion and contempt As Buchholz makes clear the United States is not the first country to suffer these fissures In The Price of Prosperity he examines the fates of previous empires those that have fallen as well as those extricated from near collapse and the ruins of war thanks to the vision and efforts of strong leaders He then identifies what great leaders do to fend off the forces that tear nations apart Is the loss of empire inevitable No Can a community spirit be restored in the U S and in Europe The answer is a resounding yes We cannot retrieve the jobs of our grandparents but we can embrace uniquely American traditions while building new foundations for growth and change Buchholz offers a roadmap to recovery and calls for a revival of national pride and patriotism to help us come together once again to protect the nation and ensure our future Drinking from the Fire Hose Christopher J Frank, Paul

Magnone, 2011-09-01 You re sitting in a windowless conference room Twenty minutes into the meeting the presenter finally makes it to slide four of a thirty two slide deck At least you can read this one unlike the others which were crammed with numbers graphs and charts You look around wondering if anyone else is following the presentation Just about everyone these days suffers from information overload the 24 7 explosion from our computers smartphones media colleagues and customers Information is essential to making intelligent decisions but more often than not it simply overwhelms us It s like trying to drink from a fire hose The question isn t how to stop all those e mails meetings conference calls and fat reports that s impossible The question is what to do with them How do you find the truly essential nuggets of information and use them with confidence The solution proposed by Christopher Frank and Paul Magnone sounds deceptively simple Learn how to ask

the right questions at the right time Whatever field you re in asking smarter questions will expose you to new information point you to connections between seemingly unrelated facts and open new avenues of discussion with your colleagues The authors explain the seven questions that can help you bring a big picture perspective to problems that often leave others buried in irrelevant details And they show through real life case studies including Trader Joe s Starbucks Kodak Microsoft iRobot and IBM how their method can have a dramatic impact It really is possible to convert the fire hose of information into useful insights Consider a nonbusiness example the 2010 Icelandic volcano eruption that sent a giant ash cloud toward Europe Tens of thousands of flights were canceled and five million passengers stranded leading to billions in economic losses Europe s best scientists generated oceans of data and carefully modeled the cloud s dispersion pattern But no one could answer the essential question Was the concentration of volcanic ash in the air enough to damage a jet engine Without that key answer all the carefully gathered facts were useless to the decision makers Once you adopt the seven questions you ll start having more productive brainstorming sessions You ll answer critical questions faster and find unexpected solutions to important problems And you ll get better at communicating to your colleagues with more clarity and focus turning down the fire hose that other people have to cope with

Sport Management Education Mike Rayner,Tom Webb,2022-01-27 This book examines a range of contemporary issues related to the global delivery of sport management education At a time of unprecedented change in Higher Education the book looks closely at how sport management education can and should deliver positive outcomes in sport business and management outside of the university The book brings together sport management academics from around the globe and examines how their practice in education has been shaped by the cultural religious and political context of the national regions in which they work It aims to identify core principles in sport management education and implementation and discusses the key aspects of sport management programmes from curriculum design and pedagogy to issues around unified accreditation and the needs of employers It also focuses in on what sport management education might look like in an increasingly digital post COVID world This is essential reading for all sport management educators and anybody working in sport related professions looking to understand global educational platforms and their implications for policy at local regional national and international level

Economics is Like Sex Jonathan M. Lamb,2018-04-03 Economics has become a taboo topic because is not well understood As a taboo topic it doesn t get discussed and since it is not discussed it is not understood what a vicious cycle Shying away from open discussions about money budgets markets and trade has resulted in many misconceptions Economics is all around us and with a little common sense understanding of economic principals Jonathan M Lamb changes the way people view the world Economics is Like Sex advocates that economics isn t a boring subject filled with charts and theories cooked up by some dead guys who lived centuries ago Economics is about decisions Decisions that relate to money life love and happiness Economics is not just for government and business but is a way of everyday life and some very simple economic thinking can make life just a little bit less complicated when it comes to money Money can t buy love or happiness but Jonathan Lamb opens the taboo topic to provide a common sense understanding of how basic easy common sense economic principals can change the way people view the world
