## **Second Language Conversations:**

Second Language Conversations Rod Gardner, Johannes Wagner, 2005-12-07 This collection is the first to consistently adopt Conversation Analysis as an approach to second language interaction. By examining first and second language speakers' participation in a wide range of activities, it challenges the dominant view of nonnative speakers as deficient communicators. Proposing instead to understand second language users' conversational participation as interactional achievement, the book makes a powerful case for ethnomethodological respecification in second language research. Professor Gabriele Kasper, University of Hawai'i. Conversations involving speakers whose first language is not the language in which they are talking have become widespread in the globalized world. Migration, increased travel for business or pleasure, as well as communication through new technologies such as the internet, make Second Language Conversations an increasingly common everyday event. In this book, Conversation Analysis is used to explore natural casual talk between speakers in a second language. The contributors shift emphasis away from controlled contexts such as the classroom towards more sociable environments in which people go about their daily routines. English, German, French, Japanese, Finnish, and Danish are all analyzed as second languages within a variety of professional, educational, and sociable situations. This collection of essays aims to present naturally occurring Second Language Conversations in order to show what speakers in these situations do, how they utilize first language conversational practices, and whether or not grammar, vocabulary, and pronunciation help or hinder the construction of meaning.

**Second Language Interaction** Salla Kurhila, 2006-05-03 Members of divergent societies are increasingly involved in interactional situations both publicly and privately where participants do not share linguistic resources. Second language conversations have become common everyday events in the globalized world, and an interest has evolved to determine how interaction is conducted and understanding achieved in such asymmetric conversations. This book describes how mutual intelligibility is established, checked, and remedied in authentic interaction between first and second language speakers both in institutional and everyday situations. The study is rooted in the interactional view on language and it contributes to our knowledge on interactional practices in particular in cases where some doubt exists about the level of intersubjectivity between the participants. It expands the traditional research agenda of conversation analysis that is based on the concepts of membership and members' shared competences. By showing in detail how speakers with restricted linguistic resources can interact successfully and achieve the institutional goals of interactions, this study also adds to our knowledge of the questions that are central in second language research, such as when and how the non-native speakers' linguistic output is modified by themselves or by the native speakers or when the non-native speakers display uptake after these modifications.
