The Innovation Complex Sharon Zukin, 2020-02-03 You hear a lot these days about innovation and entrepreneurship and about how good jobs in tech will save our cities Yet these common tropes hide a stunning reality local lives and fortunes are tied to global capital You see this clearly in metropolises such as San Francisco and New York that have emerged as superstar cities In these cities startups bloom jobs of the future multiply and a meritocracy trained in digital technology backed by investors who control deep pools of capital forms a new class the tech financial elite In *The Innovation Complex* the eminent urbanist Sharon Zukin shows the way these forces shape the new urban economy through a rich and illuminating account of the rise of the tech sector in New York City Drawing from original interviews with venture capitalists tech evangelists and economic development officials she shows how the ecosystem forms and reshapes the city from the ground up Zukin explores the people and plans that have literally rooted digital technology in the city That in turn has shaped a workforce molded a mindset and generated an archipelago of tech spaces which in combination have produced a now hegemonic innovation culture and geography She begins with the subculture of hackathons and meetups introduces startup founders and venture capitalists and explores the transformation of the Brooklyn waterfront from industrial wasteland to innovation coastline She shows how far beyond Silicon Valley cities like New York are shaped by an influential triple helix of business government and university leaders an alliance that joins C Wright Mills's power elite real estate developers and ambitious avatars of academic capitalism As a result cities around the world are caught between the demands of the tech economy and communities' desires for growth a massive and often insurmountable challenge for those who hope to reap the rewards of innovation's success

A New American Labor Movement William E. Scheuerman, 2021-10-01 The American labor movement isn't dead It's just moving from the bargaining table to the streets In *A New American Labor Movement* William Scheuerman analyzes how the decline of unions and the emergence of these new direct action movements are reshaping the American labor movement Tens of thousands of exploited workers from farm laborers and gig drivers to freelance artists and restaurant workers have taken to the streets in a collective attempt to attain a living wage and decent working conditions with or without the help of unions This new worker militancy expressed through mass demonstrations strikes sit-ins political action and similar activities has already achieved much success and offers models for workers to exercise their power in the twenty-first century Finally Scheuerman notes many of the strategies of the new direct action groups share features with the sectoral bargaining model that dominates the European labor movement suggesting that sectoral bargaining may become the foundation of a new American labor movement

Movement Nicole Gelinas, 2024-11-05 A gripping account of how the automobile has failed NYC and how mass transit and a revitalized streetscape are vital to its post-pandemic recovery In 1969 as all students of New York City history think they have learned master builder Robert Moses lost his long battle to urbanist Jane Jacobs over his planned Lower Manhattan Expressway The

ten lane elevated expressway would have sliced across SoHo and Little Italy demolishing historic buildings and displacing thousands of families and businesses Jacobs and her neighbors defeated Moses and as a result New York became the only major American city with no interstate highway running through its core Like many global cities though New York had spent fifty years during the first half of the twentieth century trying and failing to tame its heavily populated landscape to fit the private automobile New York has now spent more than fifty years trying to undo those mistakes wresting back city space for people not cars Movement New York s Long War to Take Back Its Streets from the Car chronicles the earlier less known battles that preceded the cancellation of the Lower Manhattan Expressway Jacobs became an example for generations of urban planners but whose example did Jacobs emulate in an earlier victory that saved Washington Square Park Moses may serve handily as New York s uber villain now but who before him was responsible for destroying a critical part of New York s transit system A well respected urban writer who has focused on New York s transportation system for more than a decade author Nicole Gelinas resumes the story where Robert Caro s landmark The Power Broker ended Movement explores how in the half century leading up to the COVID 19 pandemic New York s re embracement of its mass transit system and a livable streetscape helped save the city Gelinas tackles the 1970s environmental movement the 1980s rebuilding of the subways and more contemporary battles from Mayor Bloomberg s push for more pedestrian plazas and bike lanes in the early 2000s to transportation advocates protests to prevent traffic deaths in the Mayor de Blasio era of the 2010s to how New York s stewardship of its streets and subways have played a critical role during the 2020 pandemic and subsequent recovery Introducing a cast of transportation heroes to rival Jane Jacobs Shirley Hayes Hazel Henderson Richard Ravitch Nilka Martell and puncturing the myth of Moses as New York s anti hero Movement explores how New York City has helped redefine what it means to be a global city not a place that is easy to drive through but a place where people can take transit walk and bike to work to school or just for fun
