Smart Baseball Keith Law, 2017-04-25 Predictably Irrational meets Moneyball in ESPN veteran writer and statistical analyst Keith Law's iconoclastic look at the numbers game of baseball proving why some of the most trusted stats are surprisingly wrong explaining what numbers actually work and exploring what the rise of Big Data means for the future of the sport For decades statistics such as batting average saves recorded and pitching won lost records have been used to measure individual players and teams potential and success But in the past fifteen years a revolutionary new standard of measurement sabermetrics has been embraced by front offices in Major League Baseball and among fantasy baseball enthusiasts But while sabermetrics is recognized as being smarter and more accurate traditionalists including journalists fans and managers stubbornly believe that the old way a combination of outdated numbers and gut instinct is still the best way Baseball they argue should be run by people not by numbers In this informative and provocative book the renowned ESPN analyst and senior baseball writer demolishes a century's worth of accepted wisdom making the definitive case against the long established view Armed with concrete examples from different eras of baseball history logic a little math and lively commentary he shows how the allegiance to these numbers dating back to the beginning of the professional game is firmly rooted not in accuracy or success but in baseball's irrational adherence to tradition While Law goesres sacred cows from clutch performers to RBIs to the infamous save rule he also demystifies sabermetrics explaining what these new numbers really are and why they're vital He also considers the game's future examining how teams are using Data from PhDs to sophisticated statistical databases to build future rosters changes that will transform baseball and all of professional sports *Baseball Research Journal* Andy McCue, Pete Palmer, Richard Hersherberger, Max Blue, Takeyuki Inohiza, 2014-04-02 The Baseball Research Journal is the flagship research publication of the Society for American Baseball Research Founded in 1971 SABR now has over 6 000 members investigating every aspect of the sport from statistical analysis to biographical research to psychology economics physics biomechanics game theory and more In this issue Leaving a Mark on the Game Allan Roth by Andy McCue The Creation of the Alexander Cartwright Myth by Richard Hersherberger Stolen Bases and Caught Stealing by Catchers Updating Total Player Rating by Pete Palmer New York Connections McGraw's Streak by Max Blue Clyde Sukeforth The Dodgers Yankee and Branch Rickey's Maine Man by Karl Lindholm Identifying Undated Ticket Stubs An Attempt to Recapture Baseball History by Dr James Reese Outside the Majors Many Exciting Chases After the Ball Nineteenth Century Base Ball in Bismarck Dakota Territory by Terry Bohn The Great 1952 Florida International League Pennant Race by Sam Zygmier and Steve Smith Aquino Abreu Baseball's Other Double No Hit Pitcher by Peter C Bjarkman Defiance College's Historic 1961 Postseason by Roger J Hawks Analytical Looks at the Game We Love The Twisting Model and Ted Williams's Science of Hitting by Takeyuki Inohiza The Best Shortened Season Hitting Performance in Major League History by David Nemec Was There a Seven Way Game Seven Ways of Reaching First Base by Paul Hertz The Three or Was it Two 400 Hitters

Wortham, 2011-08-10 FOREWORD The core concept is not just saving money but saving time and energy as well. These savings are multiplied together giving you more money to invest. To summarize, I created the equation $ET \times M2 = INVEST$ in which saving Money, Energy, and Time (ET) are multiplied to generate More Money (M2) to INVEST. This equation is fundamental to your success. You must be prepared to take action to start having enough money to accomplish your goals to stop living paycheck to paycheck and to retire early. If you are on course to make the same income as last year or worse, facing declining take-home pay because of ever-increasing taxes, medical costs, and declining economy, don't give up. Saving money, energy, and time will generate more money to invest, creating real income and wealth. Transforming you from consumer to producer. You must expand yourself personally as well as enhance your inner and micro economics. Rather than growing a mega company's revenue or the financial fortitude of millionaires' pockets, you are going to grow your own individual savings account, retirement plan, and children's college funds. This book is a guide to help you create a path and roadmap to a life of saving money, reducing debt, living efficiently, and creating wealth by investing within a reasonable timeframe. Together we will examine four major building blocks that inspire and accelerate behavioral changes: 1. Why and how to change your behavior and lifestyle; 2. How to save money, energy, and time; 3. How to invest your money, energy, and time savings to improve your present situation and build for the future; 4. How to create and implement a transformation plan. Progressive ideas and hilarious, cheap strategies are also detailed. These are necessary to exceed your personal and financial goals. I want you to be thrilled about life, saving money for a brighter future, and early retirement while having fun at the same time. *E-effective*

Writing for E-learning Environments Katy Campbell, 2004-01-01 *E-effective Writing for E-Learning Environments* integrates research and practice in user-centered design and learning design for instructors in post-secondary institutions and learning organizations who are developing e-learning resources. The book is intended as a development guide for experts in areas other than instructional or educational technology; in other words, experts in cognate areas such as Biology or English or Nursing, rather than as a learning design textbook. The organization of the book reflects the development process for a resource course or program from planning and development through formative evaluation and identifies trends and issues that faculty or developers might encounter along the way. The account of the process of one faculty member's course development journey illustrates the suggested design guidelines. The accompanying practice guide provides additional information, examples, learning activities, and tools to supplement the text. **Sports Nation: Contemporary American**
