Primary Scripture Cosmic Religions First Lessons:

Primary Scripture Sylvester L. Steffen, 2001 In Primary Scripture author Sylvester Steffen gives a scientific perspective of the great catholic mandate to love God and to love one's neighbor as oneself In Steffen's view science documents the essential continuity of energy and matter soul and substance spirituality and materiality the natural source of rationality Steffen finds validation for new age consciousness in the wisdom of the ages Primary Scripture is a helpful first reader for anyone confused by the wave of new books seeking to connect science and religion The inspiration behind Primary Scripture is Steffen's recognition that science and religion are understood as separate and adversary realms by most people In the author's view personal and societal misdirection and incivility are root causes of global societal crises But what is civility And how does one live a civil life Answers to both questions can be found in the successful bridging of the cultured rift between science and religion Faith hope and love enable personal and public conscience to motivate personal living in service to one another Witnessing faith hope and love is Steffen's idea of civil living The most common means for correcting misdirection are communication consciousness and conscience what Steffen calls the trimorphic resonance of evolved rationality The fundamentally rational mandate to live altruistically to love God and to love one another evolves from what Steffen sees as the logical continuity between cosmic energy matter and self-aware soul body The progressive deepening of public scientific knowledge seems to be driving a new rush to find the connection between science and religion Primary Scripture is ideal for anyone seeking a religiously and scientifically harmonized worldview that has room for new age insights Back cover

Religion and Civility Sylvester L. Steffen, 2011-11-30 RELIGION CIVILITY The Primacy of Conscience the third book of the breakthrough Second Enlightenment Trilogy reveals trial and error failures and successes of past and present civilizations Man inherits from nature hard won intelligence cortical consciousness to learn from errors of irreligion and incivility Though more painful error is sometimes the most convincing teacher *Quantum Religion* Sylvester L. Steffen, 2011-11-30 QUANTUM RELIGION Enlarging from the Inside Out These times are scary but also hope filled scary because of degraded nature but hope filled because global religion is coming to new self understanding In a word religion means relationship good news is experienced in relationships Life itself is good news because it has built in intelligence that can avoid hurtful relationships and can choose sustainable relationships instead Global relationship religion is waking up to the tragic misdirection of imperial top down control in contrast to the ordered direction of organic life growing and enlarging from within Growing from the inside out happens incrementally with experience a little bit at a time But the good news is that consciousness of experience the ground of faith is cumulative by trial and error and reveals what is sustainable and what is not Organic relationships originated minutely but have grown to the point of being self reflective in the human person Essential to growth is change as experience has shown But political forces of self interest compete to create self serving webs of relationships that intend to dominate and control The monopoly control of Christian churches has been centered in

Rome under pope kings The violence of imperial overreach came to a head in medieval times and the weight of oppression so heavy at that time drove people to rebel and demand change Denominational Christianity today is made up of reform factions of original Roman Catholicism In the present time the coming apart of imperial Roman Catholicism is happening with the resignation of Emeritus Pope Benedict XVI and with the election of Pope Francis I For the first time in the history of the Roman Catholic Church it is opening up to the organic nature of life including humankind and the incremental nature of relationships growing bit by bit from within not from the top down Cosmic nature informs all relationships with the possibility and necessity of continuity and holding together from within The mentality of dominion culture underlies the waste of nature by colonial overreach and corporate capitalism The consciousness of love grounds in the universal understandings of common wellbeing and expands in the incremental growth of complexity consciousness The affirming harmony of intentional relationships is the good news of personal social wellbeing and the condition of an uplifting and sustainable future The personal search for self identity takes on new meaning in light of understanding religion as common organic relatedness in Cosmic Earth evolution The possibility of religions coming together on grounds of universal understandings is real given the wide open potentials of communication and the continuity of diverse life inside the webs of organic evolution Beyond the benefits of the personal uplift of consciousness QUANTUM RELIGION provides cohesive insights for bringing communities to a higher sense of religion and civility and the necessary sensitivity that secures natural ecologies for future wellbeing QUANTUM RELIGION is the good news of rising consciousness

What Self-Donation Is

Sylvester L. Steffen, 2010-07 About Uninformed Conscience John F Kavanaugh S J says If a nation or church forms its people to accept assertions blindly without supporting evidence it will form a community not of moral agents but of menaces They may be sincere but they will be sincere menaces AMERICA June 21 28 2010 pg 9 Conscience speaks to the meaning of Eucharist If we buy in to the Eucharistic Theology of the Cosmic Christ we must be open to the vital coinage of death The multiplication of many from one is the miracle of divine human hypostasis the miracle of the largesse of symbiotic life The amplification of life speaks to the truth that less is more that unless the seed dies there is no flourishing and amplification of life Individuality resources multiplicity even as multiplicity resources individuality spirituality is resurrection consciousness the energy of prevision and provision that does not die but transforms and transfers into multiplicity Resurrection is the consciousness of self reflective vitality About Eucharist right as grain says it best It is in dying that we live it is in giving that we receive that we become one with Other the personal oneness of Eucharist in the Cosmic Christ Wisdom is Eucharistic consciousness the intentional embrace of transformation In mindfulness we become the good seed that greens the greater abundance of life The greening of life from the dying seed informs the adage better to give than receive And so must be our individual relationship with each other and nature What Self Donation Is is about living the fulfilled abundant life of informed conscience not by blind submission to cultural death as imposed by worldview blindness of staticism and centrism Faith in
