Principles Practice Of Research Strategy For Surgical Investigators:

Principles and Practice of Research Hans Troidl, Walter O. Spitzer, Bucknam McPeck, David S. Mulder, Martin F. McKneally, Andrew S. Wechsler, Charles M. Balch, 2012-12-06 What is the best way to plan surgical research What problems are most often encountered in clinical research How should a research report be presented at a scientific meeting These questions and more are all answered in Principles and Practice of Research The second edition has added new sections on animal research models the molecular and cellular dimension of surgical research and practical guidelines for obtaining government and third party funding Other improvements include a friendlier discussion of statistics and updated material about on line computer literature searches This book provides every clinical researcher with a roadmap around the pitfalls of poorly designed studies through the jungle of incomprehensible statistics and over the hurdles of research reporting to a successful study from start to finish From the reviews of the first edition For me it is a bible and a must for every Ph D or M D involved in clinical research especially in the field of surgery It should be on the table not on the book shelf of both the young as well as the experienced investigator as a readily accessible source of information to avoid the trial and error approach to problems in surgical research World Journal of Surgery 1 a carefully conceived concise blend of factual theory and principles practical guidelines and philosophical perspective I have found it hard to identify any omission even a selected bibliography on laboratory animals their care handling and anatomy is included and impossible to single out any individual contribution each is a treasure well written concise and complete The Lancet 2 The feature of the book is that despite attention to detail it maintains a clear and practical approach to the whole field beginning with the reasons for carrying out research the types of research and above all the reporting of research Almost all aspects of research are covered from small retrospective studies to departmental institutional national and international projects The chapter on writing for publication should be compulsory reading for all budding authors Journal of Bone and Joint Surgery 3

Innovations in Diagnostic Radiology James H. Anderson, 2012-12-06 This volume of the new series Medical Radiology addresses the important topic of Innovations in Diagnostic Radiology It presents examples of current work of interest not only to the radiological community but to physicians in other medical disciplines and to scientists in general The impact of radiology on diagnostic medicine and patient management has been obvious from the beginning of our specialty However the evolution of the field is expanding at an astounding rate During the professional lifetime of one generation of radiologists alone numerous technologies and procedures have been added to conventional radiography cross sectional tomography high resolution nuclear scanning magnetic resonance imaging ultrasound interventional radiology and computer based radiological operations The optimal interpretation of images obtained by these new technologies requires that we expand our knowledge in physiology biochemistry and also in our clinical expertise It also means that radiologists must collaborate closely with other clinicians and basic scientists

Oral Presentation in Medicine A. Fingerhut, F. Lacaine, 2013-11-21 Scientific knowledge may be communicated in the written form or orally Written communication medical writing usually takes the form of original or research papers which appear in scientific journals Oral communication in medicine is usually made during a meeting and is often called a free paper Oral medical communication abides by certain rules The objectives of this book are to examine and discuss these rules Oral medical communication involves taking the floor to speak whether it be as a speaker the person who gives the talk in front of an audience or as part of the audience who can then ask questions or make comments The go between is called the moderator Some forms of oral communication are more specific to meetings with a large audience free papers panel discussions or roundtables posters and videos Others are more characteristic of smaller audiences hospital staff meetings or literature update sessions Educational talks have a didactic goal and resemble a lecture for instance in a course or are closer to a case report when they are given during a small class get together
