Sensitivity Analysis In Linear Systems:

Sensitivity Analysis in Linear Systems Assem Deif, 2012-12-06 A text surveying perturbation techniques and sensitivity analysis of linear systems is an ambitious undertaking considering the lack of basic comprehensive texts on the subject A wide ranging and global coverage of the topic is as yet missing despite the existence of numerous monographs dealing with specific topics but generally of use to only a narrow category of people In fact most works approach this subject from the numerical analysis point of view Indeed researchers in this field have been most concerned with this topic although engineers and scholars in all fields may find it equally interesting One can state without great exaggeration that a great deal of engineering work is devoted to testing systems sensitivity to changes in design parameters As a rule high sensitivity elements are those which should be designed with utmost care On the other hand as the mathematical modelling serving for the design process is usually idealized and often inaccurately formulated some unforeseen alterations may cause the system to behave in a slightly different manner Sensitivity analysis can help the engineer innovate ways to minimize such system discrepancy since it starts from the assumption of such a discrepancy between the ideal and the actual system

Structural Sensitivity Analysis and Optimization 1 Kyung K. Choi, Nam-Ho Kim, 2004-12-08 Extensive numerical methods for computing design sensitivity are included in the text for practical application and software development The numerical method allows integration of CAD FEA DSA software tools so that design optimization can be carried out using CAD geometric models instead of FEA models This capability allows integration of CAD CAE CAM so that optimized designs can be manufactured effectively

Performance Sensitivity Analysis for Linear Systems with Stable Feedback Perturbations Gao Zhiwei, 2018 The performance sensitivity of linear systems with stable feedback perturbations both on the plant and the feedback controller is discussed Using norm the sufficient condition for the robust stability is derived Also the upper bounds for the sensitivity function matrix and the closed loop transfer function matrix of the perturbed system are presented
