## **Serial Learning And Paralearning:**

*Serial Learning and Paralearning* Eugene Rae Harcum, 1975      Memory and Learning David S. Gorfein, 1987 First published in 1987 Routledge is an imprint of Taylor Francis an informa company      Children's Logical and Mathematical Cognition C.J. Brainerd, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books to be devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series will be a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence will be strongly thematic in that it will be limited to some well defined domain of cognitive developmental research e g logical and mathematical development semantic development All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors will be published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series      **A Psychology for People of God** E. Rae Harcum, 2012-04-19 This book combats the anti religious sentiment of some psychologists It argues that Christians do not have to give up their religious faith to keep the contributions of science A science compatible with religion accepts that human beings have freedom of will to select behaviors and that all methods of studying human behavior are acceptable Both of these premises are accepted by a modern view of science which recognizes its inherent subjectivity E Rae Harcum explicitly asserts the important role of spirituality in psychology especially in psychotherapy The book confronts the relation between the human body and its non material parts the mind and spirit and provides a way of looking at these metaphysical issues A Psychology for People of God promotes the need of the Christian to love and to care for his or her fellows After all fitness for survival entails the willingness to serve      **Technical Report** ,1979      **Gedächtnisprozesse bei visuellem und verbalem Material** Caspar Jüttner, 1977      **Memory and Dreams** Clara Torda, 1980      Zeitschrift für Psychologie ,1978

Phenomenology and Psychological Research Amedeo Giorgi, 1985 This book is both a theoretical justification of a phenomenological and human scientific approach to psychological research and a presentation of findings in the areas of cognitive clinical and social psychology The book is important because it is the most sustained statement to date about a phenomenological approach to psychological research along with original findings to compare with mainstream psychology in crucial areas of psychology cognitive clinical and social psychology Phenomenology and Psychological Research is further

clarification of the phenomenological approach to psychological research along with examples of application in four different content areas learning and thinking both examples of alternative approaches to cognitive processes self deception clinical psychology and criminal victimization social psychology As such it gives the reader who is merely curious about the possibilities of phenomenological approaches a good opportunity to evaluate its fruitfulness whereas those who are already sympathetic to the approach will find a greater articulation of the theory behind the procedures Lastly the reader will find in this study an example of a descriptive and qualitative approach to psychological research that claims to meet both phenomenological and human scientific criteria It is one of the first books to make such a claim about psychological research

**The American Journal of Psychology** Granville Stanley Hall,Edward Bradford Titchener,Karl M. Dallenbach,Madison Bentley,Edwin Garrigues Boring,Margaret Floy Washburn,1978      **Human Memory** Ian Neath,1998 In this up to date book author Ian Neath offers readers an exploration of the wonders of accumulated knowledge With an emphasis on theory and models as well as on research Neath maintains an ideal balance between historically significant findings and current state of the art research He illustrates the process of designing and conducting diagnostic research and in the process gives readers an appreciation of experimental design The various theories of memory are introduced with an examination of how each has been developed and evaluated      *Subject Catalog, 1975* Library of Congress,1975      **Correctional Rehabilitation and Management** Teodoro Ayllon,Michael A.
