Principles And Methods Of Temperature Measurement:

Principles and Methods of Temperature Measurement Thomas D. McGee, 1988-05-19 The concept of temperature The thermodynamic temperature scale Entropy temperature and statistical mechanics The international practical temperature scale General characteristics of temperature measuring devices and treatment of data Liquid in glass thermometers Sealed liquid or gas sensing instruments and bimetallic sensors Electrical resistance temperature measurement using metallic sensors Thermistors and semiconductors for temperature measurement Thermoelectric temperature measurement Theory of radiant heat transfer as a basis for temperature measurement by radiant techniques The disappearing filament optical pyrometer Photoelectric optical pyrometers automatic and infrared Total radiation pyrometers Novel methods of temperature measurement Pyrometric cones Calibration methods Installation effects Dynamic response of sensors Temperature instrumentation and control Thermocouple reference tables

Principles and Methods of Temperature Measurement

A. Bhatia, 2014-10-17 Temperature is a principle parameter that needs to be monitored and controlled in most engineering applications such as heating cooling drying and storage Temperature can be measured via a diverse array of sensors All of them infer temperature by sensing some change in a physical characteristic be it a thermal expansion thermoelectricity electrical resistance or thermal radiation There are four basic types of temperature measuring devices each working on a different principle 1 Mechanical liquid in glass thermometers bimetallic strips bulb Understand the principle of operation of thermocouples Peltier effect Thompson effect and Seebeck effect Describe the basic construction of a thermocouple including materials used Understand the three laws of thermocouples law of intermediate metals law of intermediate temperatures and law of additive voltages Describe the difference between grounded ungrounded and exposed junctions Describe the basic principle and construction of RTD s and Thermistors Understand the difference between the two main types of thermistors i e positive temperature coefficient PTC and negative temperature coefficient NTC Explain how RTD resistance varies for increase and decrease of temperatures using bridge circuits Describe the basic principles of radiative temperature measurement including infrared and optical pyrometers

Measurement and Instrumentation Principles Alan

S. Morris, 2001-03-09 Measurement and Instrumentation Principles is the latest edition of a successful book that introduces undergraduate students to the measurement principles and the range of sensors and instruments that are used for measuring physical variables Completely updated to include new technologies such as smart sensors displays and interfaces the 3rd edition also contains plenty of worked examples and self assessment questions and solutions In addition a new chapter on safety issues focuses on the legal framework electrical safety and failsafe designs and the author has also concentrated on RF and optical wireless communications Fully up to date and comprehensively written this textbook is essential for all engineering undergraduates especially those in the first two years of their course Completely updated Includes new technologies such as smart sensors and displays
