Separation of Variables for Riemannian Spaces of Constant Curvature E. G. Kalnins,1986 Comprehensive and up to date survey of research on torsion theories defined on module categories over noncommutative rings and the use in the localization of rings and modules   Separation of Variables for Complex Riemannian Spaces of Constant Curvature E. Handbook of Feynman Path Integrals Christian Grosche,Frank Steiner,1998-06-22 The Handbook of Feynman Path Integrals appears just fifty years after Richard Feynman published his pioneering paper in 1948 entitled Space Time Approach to Non Relativistic Quantum Mechanics in which he introduced his new formulation of quantum mechanics in terms of path integrals The book presents for the first time a comprehensive table of Feynman path integrals together with an extensive list of references it will serve the reader as a thorough introduction to the theory of path integrals As a reference book it is unique in its scope and will be essential for many physicists chemists and mathematicians working in different areas of research **Mathematical Reviews** ,1995 Journal of Physics A ,2002 Focuses on fundamental mathematical and computational methods underpinning physics Relevant to statistical physics chaotic and complex systems classical and quantum mechanics classical and quantum integrable systems and classical and quantum field theory

Revista Colombiana de Matemáticas ,1997 **Proceedings of the Royal Society. Section A, Mathematical and Physical Science** Royal Society (Great Britain),1984 *Physics of Atomic Nuclei* ,1998 **Multiparameter Eigenvalue Problems and Expansion Theorems** Hans Volkmer,1988-12-07 This book provides a self contained treatment of two of the main problems of multiparameter spectral theory the existence of eigenvalues and the expansion in series of eigenfunctions The results are first obtained in abstract Hilbert spaces and then applied to integral operators and differential operators Special attention is paid to various definiteness conditions which can be imposed on multiparameter eigenvalue problems The reader is not assumed to be familiar with multiparameter spectral theory but should have some knowledge of functional analysis in particular of Brower s degree of maps
