*Self-Portraits by Women Painters* Kathleen Russo, 2017-12-15 This title was first published in 2000 In this volume the authors trace the development of women's representation of themselves as artists from antiquity to the present day Identity and beauty are two of the most difficult and unstable concepts in art history and this account articulates many of the issues related to the portrayal of women's bodies Arranged chronologically by chapter each period is described by a specialist author Beginning with recorded accounts of the

work of artists such as Marcia Timarete and Eirene the authors take their examination through to the present day and the work of Louise Bourgeois Howardena Pindell and Paula Rego Self portraits can disclose fascinating details about the painters lives their studios their education their ability to travel and their relationship to past artistic accomplishments The setting the posture the activity of the sitter can all express confidence or the lack of it in the artist s own professional status They are also interventions in contemporary debate on the representation of women and notions of beauty In the 20th century in particular the self portrait becomes a strategic site in which women artists challenge notions of womanhood and beauty

*Women and Portraits in Early Modern Europe* Andrea Pearson,2016-12-05 As one of the first books to treat portraits of early modern women as a discrete subject this volume considers the possibilities and limits of agency and identity for women in history and with particular attention to gender as categories of analysis for women s images Its nine original essays on Italy the Low Countries Germany France and England deepen the usefulness of these analytical tools for portraiture Among the book s broad contributions it dispels false assumptions about agency s possibilities and limits showing how agency can be located outside of conventional understanding and conversely how it can be stretched too far It demonstrates that agency is compatible with relational gender analysis especially when alternative agencies such as spectatorship are taken into account It also makes evident the importance of aesthetics for the study of identity and agency The individual essays reveal among other things how portraits broadened the traditional parameters of portraiture explored transvestism and same sex eroticism appropriated aspects of male portraiture to claim those values for their sitters and as sites for gender negotiation resistance and debate invoked considerable relational anxiety Richly layered in method the book offers an array of provocative insights into its subject
