## **Portraits Postcards:**

**A Postcard History of the Passenger Liner** Christopher Deakes, 2023-10-01 From around 1880 for almost a hundred years shipowners commissioned a wealth of paintings that depicted their magnificent liners as well as the routes they travelled their exotic destinations and life onboard These paintings rich in imagination and atmosphere appeared on postcards and posters of the day and were used to advertise the companies and their ships and so was born a whole genre that produced tens of thousands of paintings which formed a wonderful record of the great era of the passenger liner In 1900 there were over thirty shipping companies operating passenger liners across the North Atlantic Other oceans were similarly served But now with just a few exceptions the companies and their liners have disappeared along with the art they once inspired Little remains to recall this aspect of our maritime past except the postcards and they tell an evocative story of the vanished world of elegant ships and leisurely travel of social and political times much changed by the history of the past century Here brought vividly to life in more than 500 colourful postcards are the ships on which so many of our predecessors sailed as emigrants soldiers administrators or simply as tourists in days long past These cards which are now highly collectable show how steamships developed over the years but they are also a fine tribute to the artists who painted them This volume also includes a glossary of some 170 illustrators which forms an important reference section and advice on collecting

**The Political Portrait** Luciano Cheles, Alessandro Giaccone, 2020-06-10 The leader's portrait produced in a variety of media statues coins billboards posters stamps is a key instrument of propaganda in totalitarian regimes but increasingly also dominates political communication in democratic countries as a result of the personalization and spectacularization of campaigning Written by an international group of contributors this volume focuses on the last one hundred years covering a wide range of countries around the globe and dealing with dictatorial regimes and democratic systems alike As well as discussing the effigies that are produced by the powers that be for propaganda purposes it looks at the uses of portraiture by antagonistic groups or movements as forms of resistance derision denunciation and demonization This volume will be of interest to researchers in visual studies art history media studies cultural studies politics and contemporary history

**Modeling the Meanings of Pictures** John Kulvicki, 2020-09-05 John Kulvicki offers an account of the many ways in which pictures can be meaningful which is inspired by the philosophy of language Pictures are important parts of communicative acts along with language gesture facial expressions and props They express wide ranges of thoughts

make assertions offer warnings instructions and commands Pictures are also representations They have meanings which help explain the range of communicative uses to which they can be put Modelling the meanings of pictures is accounting for the ways in which pictures manage to be meaningful with an eye toward how those meanings let us use them as we do By framing pictures with the philosophy of language we acquire new perspectives on the many things we can do with them Sometimes pictures are used as descriptions he looks like this while sometimes they are used more like singular terms find him while showing a mug shot Most picture making cultures also have iconographies but this is usually put to one side in discussions of pictures if it is mentioned at all Likewise some uses of pictures especially in advertising are metaphorical and very little has been said about metaphor in pictures Pictures are also related in important ways to other kinds of representations like maps and this book provides a new way of understanding what makes them alike and different By showing that pictures are very different from languages this book also shows that the tools developed with language in mind are not actually specific to linguistic phenomena
