theoretical study devoted entirely to portraiture Drawing on a broad range of images from Antiquity to the twentieth century which includes paintings sculptures prints cartoons postage stamps medals documents and photographs Richard Brilliant investigates the genre as a particular phenomenon in Western art that is especially sensitive to changes in the perceived nature of the individual in society The author s argument on behalf of portraiture and he draws on examples by such artists as Botticelli Rembrandt Matisse Warhol and Hockney does not comprise a mere survey of the genre nor is it a straightforward history of its reception Instead Brilliant presents a thematic and cogent analysis of the connections between the subject matter of portraits and the beholder s response the response he or she makes to the image itself and to the person it represents Portraiture s extraordinary longevity and resilience as a genre is a testament to the power of this imaginative transaction between the subject the artist and the beholder
