Positive Self Analysis:

Self-assessment John T. Breidert, 2009 Across the spectrum of self assessment research a topic of debate concerns the accuracy by which individuals can evaluate their own performance While some research has found self assessment to be an effective measure the majority typically found it to be an under or over estimation of actual performance Although the accuracy of self assessment has seen skepticism benefits have been well documented The current review is the result of examination concerning self assessment accuracy and utility The literature was searched to evaluate the ability of trainees job incumbents students to accurately report their level of ability or performance Upon examination of the self assessment accuracy literature problems arose concerning terminology and differential utilization of self assessment This review reports that self assessment as currently used is generally inaccurate but given appropriate consideration of the moderating variables and clarification of terminology self assessment accuracy could increase The Army should utilize a continuum of self assessment considering domain and skill level as determinant factors Self grading could be useful for the introduction and training of new skills Self impression may be useful for assessing Soldiers confidence self perception of personality or traits and continuous performance appraisal Implementation of the continuum has potential to improve training quality and skill retention throughout the Army DTIC

The Dynamic Perspective in Personality and Social Psychology Robin R. Vallacher, Stephen John Read, Andrzej Nowak, 2002-11-01 Recent years have witnessed the ascendance of a new way to conceptualize and investigate the nature of dynamism at different levels of psychological reality Areas of inquiry as diverse as cognitive neuroscience developmental psychology organizational behavior and political sociology are being reframed in terms that allow rigorous and precise insight into basic dynamic processes There are signs that this new approach to dynamics is emerging as a potentially integrative paradigm for personality and social psychology as well This special issue highlights this new paradigm and illustrates its relevance to a broad spectrum of topics in personality and social psychology
