Positron Electron Gas Scattering Proceedings Of The 3rd International Workshop:

Positron (Electron): Gas Scattering - Proceedings Of The 3rd International Workshop Walter E Kauppila, Talbert S Stein, Jogindra Mohan Wadehra, 1986-04-01 This workshop discusses the current state and future directions of research in positron gas scattering particularly in the relationship between positron and electron scattering by the same atoms and molecules The possible applications of positron gas scattering to astrophysical phenomena have also been discussed

Positron And Positronium Chemistry - Proceedings Of The Third International Workshop Jerry Y C Jean, 1990-11-27 This workshop on the subject of positron and positronium chemistry is the third international conference after those in Blacksburg Virginia 1979 and in Arlington Texas 1986 The fields of interests are interdisciplinary such as radiation chemistry superconductivity polymer chemistry biochemistry quantum chemistry and nuclear chemistry **Positron Physics** M.

Charlton, J. W. Humberston, 2005-10-13 This book provides a comprehensive and up to date account of the field of low energy positrons and positronium within atomic and molecular physics It begins with an introduction to the field discussing the background to low energy positron beams and then covers topics such as total scattering cross sections elastic scattering positronium formation excitation and ionisation annihilation and positronium interactions Each chapter contains a blend of theory and experiment giving a balanced treatment of all the topics The book will be useful for graduate students and researchers in physics and chemistry It is ideal for those wishing to gain rapid in depth knowledge of this unique branch of atomic physics *Atomic Physics with Positrons* J.W. Humberston, E.A.G. Armour, 2012-12-06 The NATO Advanced Research

Workshop on Atomic Physics with Positrons which was held at University College London during 15-18 July 1987 was the fourth meeting in a series devoted to the general theme of positron collisions in gases Previous meetings have been held at York University Toronto 1981 Royal Holloway College Egham 1983 and Wayne State University Detroit 1985 Recent very significant improvements in positron beam currents due to the development of more efficient moderators and the use of more intense positron sources are making possible an increasingly sophisticated range of experiments in atomic collision physics Whereas a few years ago only total scattering cross sections could be determined measurements can now be made of various partial and differential cross sections Intense positron beams are also being used to produce positronium beams and already as reported here preliminary investigations have been made of collisions of positronium with several target systems These experimental developments have stimulated and been stimulated by steady if somewhat less spectacular progress in associated theoretical studies Both aspects of the field are well represented in these Proceedings Physics Briefs, 1993
