Search for the Causes of Schizophrenia Heinz Häfner, Wagner F. Gattaz, 2012-12-06 H HAFNER and W F GATTAZ Between 1891 and 1955 three founders of modern psychiatry Emil Kraepelin 1856 1926 Karl Jaspers 1883 1969 and Kurt Schneider 1887 1967 lectured at the University of Heidelberg Kraepelin for 12 years Jaspers for over 25 years and Schneider for approximately 10 years During this period they laid the foundations of descriptive psychopathology and modern classification and contributed essentially to the development of our current thinking on schizophrenia In 1986 on the occasion of the 600th anniversary of the University of Heidelberg we held a symposium in memory of these three giants of psychiatry for which we chose the title Search for the Causes of Schizophrenia It was jointly organized by the Central Institute of Mental Health in Mannheim and the Department of Psychiatry of the University of Heidelberg The intention was to meet one of the major challenges of current psychiatric research namely the fact that since Kraepelin s masterly description of Dementia praecox 1894 and E Bleuler s slightly different definition of schizophrenia 1911 we have made only insufficient advances in clarifying the aetiology of this frequent and still often disabling mental disease

Positron Emission Tomography of the Brain W.-D. Heiss, M.F. Phelps, Michael E. Phelps, 1983-04 The International Symposium on Positron Emission Tomography of the Brain was held at Schloss Auel in Lohmar near Cologne FRG on May 3rd to 8th 1982 This isolated place was chosen to bring together and keep together people active in research

employing PET The participants were asked to report their ongoing work to discuss upcoming problems and to indicate future developments In contrast to the large international meetings which suffer from lack of time for discussion and are affected by the distractions of major cities our symposium provided ample opportunity for discussion during the scientific sessions and guaranteed a free exchange of ideas during the leisure time spent together It also gave us the chance to celebrate the founding of a new Max Planck Institute for Neurological Research whose two departments are headed by Dr K A Hossmann and myself and to mark the start of positron emission tomography in our laboratory The book contains the invited papers presented at the meeting and the formal minipapers given at the final general discussion moderated superbly by Dr L Sokoloff In order to accelerate publication the discussions of the individual papers and the final discussion have been omitted However every participant will remember the atmosphere and the highlights of the discussions which gave a special character to the whole event
