Diachronic Clues to Synchronic Grammar Eric Fuß, Carola Trips, 2004-10-13 This volume emphasizes a new line of thinking in generative grammar which acknowledges that certain synchronic properties of languages can only be fully understood if diachronic data is taken into consideration The central topics addressed in this collection of papers are 1 a critical assessment of the hypothesis that certain apparently synchronic generalizations are actually the result of the mechanisms of language change 2 an inquiry into how diachronic data can be used to evaluate and shape formal analyses of particular synchronic phenomena Reviving the interest in diachronic explanations for synchronic data the contributions provide novel and original diachronic accounts of phenomena that up to now have escaped a deeper synchronic explanation including the nature of EPP features gaps in the distribution of complementizer agreement and counterexamples to the generalization that rich verbal inflection correlates with verb movement **Grammaticalization as Economy** Elly van Gelderen, 2004-08-31 This book provides much detail on the changes involving the grammaticalization of personal and relative pronouns topicalized nominals complementizers adverbs prepositions modals perception verbs and aspectual markers It accounts for these changes in terms of two structural economy principles Head Preference expresses that single words i e heads are used to build structures rather than full phrases and Late Merge states that waiting as late as possible to merge i e be added to the structure is preferred over movement The book also discusses grammar external processes e g prescriptivist rules that inhibit change and innovations that replenish the grammaticalized element Most of the changes involve the extended CP and IP as elements grammaticalize clause boundaries disappear Cross linguistic differences exist as to whether the CP IP and VP are all present and split and this is formulated as the Layer Principle Changes involving the CP are typically brought about by Head Preference whereas those involving the IP and VP by Late Merge **Balkan Syntax and Semantics** Olga Mičeska Tomić, 2004-07-22 The book deals with some syntactic and semantic aspects of the shared Balkan Sprachbund properties In a comprehensive introductory chapter Tomić offers an overview of the Balkan Sprachbund properties Sobolev displaying the areal distribution of 65 properties argues for dialect cartography Friedman on the example of the evidentials argues for typologically informed areal explanation of the Balkan properties The other contributions analyze specific phenomena polidefinite DPs in Greek and Aromanian Campos and Stavrou Balkan constructions in which datives combine with impersonal clitics or non active morphology Rivero Balkan optatives Ammann and Auwera imperative force in the Balkan languages Isac and Jakab clitic placement in Greek imperatives Bošković focused constituents in Romanian and Bulgarian Hill synthetic and analytic tenses in Romanian D Hults Coene and Avram purpose like modification in a number of Balkan languages Bučarovska Balkan modal existential wh constructions Grosu child and adult strategies in interpreting empty subjects in Serbian Croatian Stojanović and Mareš conditional sentences in Judeo Spanish Montoliu and Auwera **Clitic and Affix Combinations** Lorie Heggie, Francisco Ordóñez, 2005-03-18 In this volume the relationship

between clitics and affixes and their combinatorial properties has led to a serious discussion of the interface between syntax morphology semantics and phonology that draws on a variety of theoretical perspectives e.g. HPSG Optimality Theory Minimalism Clitic affix phenomena provide a rich range of data not only for the identification of an affix vs clitic but also for the best way to explain ordering constraints some of which are contradictory A range of languages are considered including Romance and Slavic languages as well as Turkish Greek Icelandic Korean and Passamaquoddy Moreover several articles consider dialectal microparameterization notably in Spanish French and Occitan This volume thus reflects current debate on issues such as clitic ordering constraints the relationship of clitics to inalienable possession and the left periphery and templatic approaches to affixes vs clitics while examining a broad range of languages

Verb Clusters Katalin É.

Kiss, Henk van Riemsdijk, 2004-05-28 Many languages have constructions in which verbs cluster But few languages have verb clusters as rich and complex as Continental West Germanic and Hungarian Furthermore the precise ordering properties and the variation in the cluster patterns are remarkably similar in Hungarian and Germanic This similarity is of course unexpected since Hungarian is not an Indo European language like the Germanic language group Instead it appears that the clustering inversion and roll up patterns found may constitute an areal feature This book presents the relevant language data in considerable detail taking into account also the variation observed for example among dialects But it also discusses the various analytical approaches that can be brought to bear on this set of phenomena In particular there are various hypotheses as to what is the underlying driving force behind cluster formation stress patterns aspectual features morpho syntactic constraints And the analytical approaches are closely linked to a number of questions that are at the core of current syntactic theorizing does head movement exist or should all apparent verb displacement be reduced to remnant movement are morphology and syntax really just different sides of the same coin

Adverbials Jennifer R. Austin, Stefan

Engelberg, Gisa Rauh, 2004-08-31 Adverbials have become an important testing ground for research on the interfaces between syntax semantics and pragmatics The articles selected for this volume present recent research on this topic Among the issues addressed are the occurrence of adverbials in various domains of the sentence Mittelfeld left and right periphery adverbials in front of gaps and the influence of the discourse context on the interpretation and position of adverbials Particular classes of adverbials that are discussed include domain locative temporal manner transparent and degree adverbials Beyond the exploration of these topics the volume reflects the current debate between proponents of semantic driven approaches to the positioning of adverbials which assume adverbials to be adjuncts and approaches that claim a primacy of syntax in conceiving of adverbials as specifiers in a universally valid hierarchy of functional projections

Focus

Structure in Generative Grammar Carsten Breul, 2004-04-29 The notion of focus structure in this work refers to the distinction between categorical thematic and identificational sentences The central claim is that the syntactic representation of every sentence has to encode which of these types of focus structure is realized This claim is discussed in great detail with

respect to syntax intonation and semantics within the framework of the Minimalist Program It is shown that the incorporation of focus structure into syntax offers new perspectives for a solution of vexing problems in syntax and semantics For example fronting preposing topicalisation is treated as a syntactic operation which clearly belongs to core grammar i e is not optional or stylistic the semantic notion of quantifier raising is dispensed with in favour of a focus structural treatment of phenomena which gave rise to it The book appeals to generative linguists and to functional linguists who do not believe in an unbridgeable gap between the formal and functional analysis of language **Islands and Chains** Cedric Boeckx, 2003-07-17 The present work provides a detailed analysis of chain formation and locality conditions imposed on it within the Minimalist Program It does so by analyzing resumptive strategies in great detail This study claims that resumptive pronouns and their antecedents are first merged as constituents and are separated via movement thus forming instances of discontinuous constituents Resumptive chains are thus akin to the well known stranding analysis of quantifier float A taxonomy of islands is developed that crucially ties barriers for movement to agreement possibilities The stranding of a resumptive pronoun is shown to limit the role of agreement for the moving element thereby allowing a chain to be formed across an island

Advances in Greek Generative Syntax Melita Stavrou, Arhonto Terzi, 2005-05-19 This collection of original research focuses on various lesser studied aspects of Greek syntax The articles combine a sound empirical coverage within current developments of generative theory and cover a wide spectrum of areas The syntax of sentential structure is dealt with by two articles one is an extensive analysis of the distribution of goal and beneficiary dative DPs in Greek and cross linguistically and the other addresses the relation agree in small clauses and between adjectives and nouns Two articles study the acquisition of the left periphery and of eventivity and one focuses on the historical evolution of participles in Greek out of which gerunds emerged The syntax and semantics of wh clauses in DP positions and of the non volitional verb *elo* are the focus of two articles situated in the syntax semantics interface The DP domain is approached by two theoretical articles one on a Greek possessive adjective and another on determiner heads The final contribution studies the acquisition of the Greek definite article **Possessors, Predicates, and Movement in the Determiner Phrase** Artemis Alexiadou, Chris

Wilder, 1998-01-01 This volume presents a cross section of current research on the internal syntax of Determiner Phrases DPs with special emphasis on the analysis of DPs modified by genitival adjectival and other non finite attributes Possessors Predicates and Movement in the DP illustrates clearly the ongoing debate over older and more recent approaches to the syntax of DPs in particular in the wake of the minimalist program Chomsky 1995 and Kayne's antisymmetry hypothesis Kayne 1994 The relative theoretical coherence among the contributions permits detailed comparison of specific syntactic proposals providing a solid basis for further debate Several of the papers address the syntactic questions in parallel with related semantic or morphological issues The value of this collection to the study of Universal Grammar is also underlined by its comparative bias Analyses of Germanic Romance and Balkan languages figure prominently and a number of new empirical

generalizations within and between languages are discussed **UG and External Systems** Anna Maria Di Sciullo, 2005-04-26 This book explores the interaction of the grammar with the external systems conceptual intentional and sensori motor The papers in the Language section include configurational analyses of the interface properties of depictives clitic clusters imperatives conditionals clefts as well as asymmetries in the structure of syllables and feet The Brain section discusses questions related to human learning and comprehension of language the acquisition of compounds the acquisition of the definite article the subject object asymmetry in the comprehension of D Linked vs non D linked questions the evidence for syntactic asymmetries in American Sign Language the acquisition of syllable types and the role of stress shift in the determination of phrase ending The papers in the Computation section present different perspectives on how the properties of UG can be implemented in a parser implementations of different theories including configurational selection incorporation and minimalism and the role of statistical and quantitative approaches in natural language processing **American Book Publishing Record Cumulative 1998** R R Bowker Publishing, 1999-03 *Linguistics and Language Behavior Abstracts*, 2001 Language George Melville Bolling, Bernard Bloch, 2000 *From NP to DP* Martine Coene, Yves D'hulst, 2003-07-17 This is the second of a two volume selection of refereed and revised papers originally presented at the special workshop of the international conference From NP to DP at the University of Antwerp Reflecting the stage of current research with respect to the expression of possession in the noun phrase it focusses on issues such as alienable and inalienable possession internal and external syntax of possessors interaction between determiners and possessors interpretation of possessors and typology of possessors The papers preceded by an up to date overview and discussion of the most important studies in the field provide an excellent basis for comparative analyses of possession in the noun phrase between a large number of languages
