Post-Traumatic Stress Disorder Sourcebook Glenn R. Schiraldi, 2000-01-22. For the millions who suffer from the effects of a traumatic experience, this book offers help and hope and provides the diverse elements needed for lasting recovery. Trauma can take many forms, from the most disturbing of circumstances, such as witnessing a murder or violent crime, to the subtle trauma of living with the effects of abuse or alcoholism. Deep emotional wounds often seem like they will never heal, but Schiraldi has helped and witnessed survivors recover, grow, and find happiness. By helping people recognize the coping mechanisms and by dealing directly with the effects of a traumatic experience, there is a great reason for hope. The Post-Traumatic Stress Disorder Sourcebook is a guide for both survivors and their loved ones, helping them to see that on the other side of their pain is recovery and growth. Explains the psychic defenses that can go into effect to protect a victim from further emotional harm. Provides information on triggers and the debilitating effects of post-traumatic stress disorder. Addresses how the healing process can begin and how fear diminishes through a variety of medical and nonmedical treatment methods.

Assessing and Treating Victims of Violence John Briere, 1994. Recent research has shown that a significant proportion of North American children are sexually, physically, or psychologically abused each year, and that the number of reports of adult rape, spousal abuse, and physical assault by strangers continues to grow. Beyond the epidemiology of societal violence, per se, is its impact on the mental health of those who live in our culture. Scientists and clinicians are beginning to trace the genesis of a number of psychological symptoms and disorders to childhood or adult

traumatic events many of which involve interpersonal violence As a result a new specialty of mental health practitioners has evolved one specifically concerned with the assessment and treatment of psychological trauma At the same time however the typical front line clinician is bound to encounter children and adults who have been victimized and who present complex post traumatic sequelae It is for both the trauma specialist and the general clinician that this sourcebook was developed Although the subject matter is disturbing growing assessment and treatment technology give us new hope for treating victims of violence This is the 64th issue of the quarterly journal New Directions for Mental Health Services For more information on the series please see the Journals and Periodicals page
