Post Apartheid Patterns Of Internal Migration In South Africa:

Post-apartheid Patterns of Internal Migration in South Africa P. C. Kok, 2003 Popular belief is that urbanisation has increased substantially in the new South Africa when in fact patterns of internal migration have remained static since the late 1970s

Migration in South and Southern Africa Pieter Kok (Zuid-Afrika.), 2006 Covers three broad areas macro level migration trends in sub Saharan Africa micro level factors in South African migration and a synthesis of current migration theory

Engaging Schooling Subjectivities Across Post-apartheid Urban Spaces Aslam Fataar, 2015-09-30 Aslam Fataar one of South Africa's few educational sociologists working with ethnographic methods captures the complex interactions and dynamics between social life school processes and youth subjectivity in townships in the Western Cape His work with concepts of mobilities and space is enormously generative providing a way for teachers principals communities and policy makers to engage with the complex ecologies of young people's learning in urban schools As an astute policy analyst he also well knows the systemic barriers in the way of achieving this The last chapter on possibilities for pedagogical justice at the site of the school considers how disengaged students might re engage through leveraging explicit pedagogic connections between their lifeworlds and school practices Acknowledging that pedagogy cannot be the only means for revitalising schooling the author nevertheless insists that marginalised young people's consent needs to be won by schools that make use of rather than ignore their strengths knowledges and aspirations The approach to the troubled question of youth and subjectivity is enlightening and vital to understanding the post apartheid city and school The book fills a much needed gap in educational sociology in South Africa

Circular Migration in Zimbabwe & Contemporary Sub-Saharan Africa Deborah Helen Potts, 2010 The World Bank insists that the urban share of sub Saharan Africa's population is rapidly increasing this study shows that in many countries this is no longer true as migration strategies have adapted in response to economic and political change Circular migration whereby rural migrants do not remain permanently in town has particular significance in the academic literature on development and urbanization in Africa often having negative connotations in southern Africanist studies due to its links with an iniquitous migrant labour system Literature on other African regions often views circular migration more positively This book reviews the current evidence about circular migration and urbanization in sub Saharan Africa The author challenges the dominant view that rural urban migration continues unabated and shows that circular migration has continued and has adapted with faster out migration in the face of declining urban economic opportunities The empirical core of the book illustrates these trends through a detailed examination of the case of Zimbabwe based on the author's longstanding research on Harare The political and economic changes in Zimbabwe since the 1980s transformed Harare from one of the best African cities to live in over this period to one of the worst Harare citizens livelihoods exemplify in microcosm the central theme of the book the re invention of circulation and rural urban links in response to economic change Deborah Potts is a Senior Lecturer in the Geography Department of King's College London She

works in the broad research field of urbanization and migration in sub Saharan Africa particularly southern Africa and has conducted research on these themes in Harare in Zimbabwe since 1985 Southern Africa South Africa Botswana Lesotho Swaziland Namibia and Zimbabwe University of Cape Town Press PB The Oxford Handbook of the South African Economy Arkebe Oqubay, Fiona Tregenna, Imraan Valodia, 2021-11-18 While sharing some characteristics with other middle income countries South Africa is a country with a unique economic history and distinctive economic features It is a regional economic powerhouse that plays a significant role not only in southern Africa and in the continent but also as a member of BRICS However there has been a lack of structural transformation and weak economic growth and South Africa faces the profound triple challenges of poverty inequality and unemployment Any meaningful debate about economic policies to address these challenges needs to be informed by a deep understanding of historical developments robust empirical evidence and rigorous analysis of South Africa s complex economic landscape This volume seeks to provide a wide ranging set of original detailed and state of the art analytical perspectives that contribute to scientific knowledge as well as to well informed and productive discourse on the South African economy While concentrating on the more recent economic issues facing South Africa the handbook also provides historical and political context It offers an in depth examination of strategic issues in the country s key economic sectors and brings together diverse analytical perspectives *Handbook on Rural-Urban Linkages in the Global South* Cecilia Tacoli, Jytte Agergaard, Manja Hoppe Andreasen, Donald Brown, 2025-02-12 This Handbook offers a comprehensive review of how in rapidly urbanizing low and middle income countries the links between rural and urban areas people and enterprises are becoming increasingly intense and complex With a focus on how rural urban linkages are being shaped by the intersection of the local and the global this Handbook illustrates how and where locally specific geographic socio economic and political contexts interact with global dynamics Routledge Handbook of Environmental Displacement and Migration Robert McLeman, François Gemenne, 2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement and the field has now reached a point in terms of profile complexity and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted So far such a product does not exist The Routledge Handbook of Environmental Displacement and Migration provides a state of the science review of research on how environmental variability and change influence current and future global migration patterns and in some instances trigger large scale population displacements Drawing together contributions from leading researchers in the field this compendium will become a go to guide for established and newly interested scholars for government and policymaking entities and for students and their instructors It explains theoretical conceptual and empirical developments that have been made in recent years describes their origins and connections to broader topics including migration research development studies and international public policy and law and highlights emerging areas where new and or additional research and reflection are

warranted The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics and to obtain a broad reliable survey of what is presently known about the subject

Internal Migration and Development Priya Deshingkar,Sven Grimm,International Organization for Migration,2005 The report argues that internal migration can play an important role in poverty reduction and economic development internal migration should therefore not be controlled or actively discouraged Policy should instead concern itself with ways of maximizing the potential benefits of migration to the individual concerned and society at large While there have been few formal efforts to estimate the economic contribution of migrant labour it is evident that many developing countries would probably not have had the roads buildings manufacturing and trade centres that they have today had it not been for migration
