Post Communist Reform Pain And Progress:

Post-communist Reform, 1993 Neoliberalism, Accountability, and Reform Failures in Emerging Markets Luigi Manzetti, 2015-10-13 The agenda of neoliberal market reform known as the Washington Consensus which was meant to turn around the economies of developing and postcommunist countries and provide the bedrock of economic success on which stable democracies could be built has largely proved to be a failure with Russia and many Latin American countries like Argentina left in severe economic crisis by the end of the 1990s Some proponents of neoliberal reform such as Anne Krueger have attributed this failure to the piecemeal and incomplete implementation of reform measures while others including Nobel Prize economist and former World Bank vice president Joseph Stiglitz have pointed to technical flaws in the policies While both of these assessments focus narrowly on economic factors Luigi Manzetti highlights the crucial importance of political institutions and processes to a fully adequate explanation His argument is that the ideology of neoliberal reform rooted in the theories of Friedrich von Hayek and Milton Friedman assumed political checks and balances that did not exist in many of these countries undergoing market reform and that only by taking political accountability as an influential variable in the equation for success can we really understand what happened Where accountability was weak patterns of corruption collusion and patronage worked to undermine the intended aims of market reform Manzetti uses both large N statistical analyses and small N case studies of Argentina Chile and Russia to provide empirical evidence for his argument

Alternative Political Economy Models of Transition Marangos, **Alternative Political Economy Models of Transition** John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be

able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition

The Economics and Politics of Transition to an Open Market Economy Andrei Shleifer,Daniel Treisman,Organisation for Economic Co-operation and Development. Development Centre,1998 **Alternative Economic Models of Transition** John Marangos,2004 Marangos illustrates and develops an analytical framework proposing different models of transition for Central Eastern Europe and the former Soviet Union economies based on a political economy approach This makes it possible to understand the complexities of the transition process from a new and more enlightened perspective and to take account of the differing opinions of economists This approach contrasts with the actual approach adopted at the time by the transition economies which has been dominated by the neoclassical models in particular the shock therapy approach transition The Shock Therapy model The Neoclassical Gradualist model The Post Keynesian model The Pluralistic Market Socialist model and The Non Pluralistic Market Socialist model the Chinese model By analysing the transition problem from a political economy perspective it is possible to reveal the inconsistencies within each transition model and between such models and therefore to identify the potentialities regarding the implementation and maintenance of the necessary reforms that each model recommended In conclusion an attempt has been made to identify an optimal model of transition which maximises social welfare *Post-Communist Reform* Olivier J. Blanchard,Maxim Boycko,Marek Dabrowski,Rüdiger Dornbusch,Richard Layard,Andrei Shleifer,1993-10 In their earlier report Reform in Eastern Europe the WIDER group assessed the main building blocks of a successful transition in Eastern Europe stabilization price liberalization privatization and restructuring For the last three years this group of leading economists has been heavily involved in the reform process In this new report they take stock returning to the original themes and assessing progress and prospects particularly in Russia Stabilization in the major Central European countries was done very much by the book Russia in contrast is following a path of restructuring without stabilization The authors discuss how far this alternative strategy is

likely to get Turning to privatization they note that initial plans started from the assumption that the state owned the assets As slow progress of those plans has painfully shown this was the wrong assumption They point out that assets have in fact many de facto claimants from managers to workers to local authorities to ministries and discuss how the current Russian privatization program starts and builds up from this more realistic assessment In the face of a collapse of trade in Eastern Europe triggered by reform in Central Europe and a similar collapse between republics following the breakup of the Soviet Union the authors show how simple measures such as a payments union can be used to increase trade and output Post Communist Reform concludes with a look at restructuring in Poland The authors focus on the behavior of the state the growth of the private sector the role of financial systems and the coherence of overall government policy ending on a note of cautious optimism

Postcommunist Transformation and the Social Sciences Frank Bönker, Klaus Müller, Andreas Pickel, 2002-06-03 The work's major substantive themes revolve around problems of post communist socio economic transformations Specifically it explores post communist systemic change the role of religion and collective identity the significance of trust and economic culture patterns of state economy interactions in enterprise restructuring the context of EU expansion the strengths and weaknesses of economic theory and neo liberal doctrine and the history of ideas in the post communist transformation debate
