The Economic Sources of Social Order Development in Post-socialist Eastern Europe Richard Connolly, 2013 Nearly twenty years after the collapse of socialism the countries of post socialist Eastern Europe have experienced divergent trajectories of political development This book looks at why this is the case based on the assumption that societies or social orders can be distinguished by the extent to which competitive tendencies contained within them economic political social and cultural are resolved according to open rule based processes The book explores which economic conditions allow for increased levels of political competition and it tests the hypothesis that the nature of a country's ties with the international economy and the level of competition within a country's economic system will shape the trajectory of political competition within that society The book goes on to argue that after several decades of relative bloc autarky during the socialist period the ongoing process of reintegration with the international economy across the post socialist region has resulted in distinct patterns of structural economic development and that that these patterns are of crucial importance in explaining the variation in social order type across the post socialist region By offering a more precise analysis of the causal mechanisms that link economic and political competition the book makes a useful contribution to research on the different patterns of political behaviour that have been observed across the post socialist region since the collapse of the socialist regimes

World Order after Leninism Vladimir Tismaneanu, Marc Morje Howard, Rudra Sil, 2016-06-01 World Order after Leninism examines the origins and evolution of world communism and explores how its legacies have shaped the post Cold War world order The lessons of Leninism continue to exert a strong influence in contemporary foreign affairs most visibly in Poland and other post communist states of the former Soviet Union but also in China and other newly industrialized states balancing authoritarian impulses against the pressures of globalization free markets and democratic possibilities World Order after Leninism began as a conversation among former students of Ken Jowitt professor of political science at the University of California at Berkeley from 1970 2002 and whose monumental career transformed the fields of political science Russian studies and post communist studies Using divergent case studies the essays in this volume document the ways in which Jowitt's exceptionally original work on Leninism's evolution and

consolidation remains highly relevant in analyzing contemporary post communist and post authoritarian political transformations

Global Connections and Emerging Inequalities in Europe Deema Kaneff, Frances Pine, 2011 This book explores connections between poverty and migration in the context of the expansion of neoliberalism in Europe The last decade has witnessed a massive movement of people in response to rising inequalities as a result of political changes and economic reforms implemented across the continent As people seek new opportunities movement itself becomes part of the process of generating new inequalities The chapters in this volume provide vivid examples of local participation in such global processes

Informal Economies in Post-Socialist Spaces J. Morris, A. Polese, 2015-06-23 Informed by in depth case studies focusing on a wide spectrum of micro and macro post socialist realities this book demonstrates the multi faceted nature of informality and suggests that it is a widely diffused phenomenon used at all levels of a society and by both winners and losers of post socialist transition

Subject Guide to Books in Print, 1993

Reflecting Transformation in Post-socialist Rural Areas Maarit Heinonen, 2007 The rural reforms in many post soviet countries produced a number of unintended consequences The reforms were guided by ideals of romanticized society of family farmers they were to be the basis of the rural middle class together with owners of non agricultural SME TM s acting as guardians of democracy and common good The guidelines were set by advisers from World Bank and IMF who preferred family farms or individual farms over the collective enterprises In most

countries the result was nothing like those envisaged by reformers. Instead of efficient and productive family farms the result was almost complete de-capitalization of agriculture and collapse of production. The reform was destructive not only as far as production is concerned but more importantly to rural communities. Social ties which were based on the collective farm as the main economic and social resource for local community were eroded. Only from the turn of this decade some early stages have been visible of new developments in economic and social life in post-socialist rural areas. The result is that now more than fifteen years since the beginning of agricultural reforms the key agricultural producers in Russia, Baltic countries and elsewhere are very large capitalist farms or large agricultural holding companies. This anthology is based on the presentations given at the 5th Aleksanteri Conference 10-11 November 2005 in Helsinki, Finland, and it is devoted to the analysis of some of these issues. The volume is divided into two parts: in the first part the focus is on the patterns and problems of transformation of post-socialist agriculture and agricultural policies, while the second part focuses mainly on efforts to revitalize rural communities and issues of local development.

Post-ality Mas'ud Zavarzadeh, Teresa L. Ebert, Donald E. Morton, 1995. These are not friendly times for starting a new Marxist journal and yet these are exactly the times in which a new Marxist journal is urgently needed to provide transformative knowledges for social change. Transformation is a response to the crisis of revolutionary theory and praxis. The post-modern left has abandoned the project of revolution in favor of bourgeois democracy, marginalized problems of labor class and exploitation and elided the centrality of need. More to the point, left theory has deserted economic and labor issues at a time of increasing class differences between North and South, the poor and the rich, the world over, at a time when the workers of the world are increasingly subjected to exploitation by ever more innovative technologies and subtle forms of management to keep the rate of profit high for transnational cartels. In opposition to the post-al left and its ludic politics, Transformation deploys classical Marxist theory to provide boundary explanations of contemporary capitalism without borders. It places classical Marxist theory in new terrains and brings it to bear on understanding the emerging contradictions in post-al societies, from labor relations to sexuality, from markets to the cyberspaces of virtual reality, from health care to crime and family values, from post-al forms of racism to hyper-colonialism and welfare. Transformation is a vanguard journal opposing both nostalgia and utopia and insisting on developing rigorous materialist boundary explanations of post-al social totality. The boundary analyses in short that are necessary for sustained intervention by revolutionary praxis in ending private ownership of the means of production and establishing international socialism.
