## **Postmodern Military Armed Forces After The Cold War:**

The Postmodern Military Charles C. Moskos, John Allen Williams, David R. Segal, 2000 Assesses contemporary civil military trends by looking at specific areas in the US military This book provides the student and defense professional with a foundation on which to base organizational and personal policies It also tells readers about what life is really like in military and how it is both the same and different around the world *Israel's Armed Forces in Comparative Perspective* Stuart A. Cohen, 2010-01-21 This edited book constitutes the first detailed attempt at a comparative international analysis of the transformations that are currently affecting the composition of the Israel Defense Forces IDF and their place in Israeli society Focusing primarily on deviations from the traditional norm of universal military service the book compares the emergence of a new type of citizen army in Israel with the formats that have in recent decades become evident in other western democracies In addition these essays correct the conventional tendency to concentrate almost exclusively on the influences stimulating military institutional change in the West and thereby to overlook the equally important factors that retard its momentum By contrast this volume deliberately highlights the brakes as well as the accelerators in current processes thereby presenting a far more faithful picture of their complexity This book will be of much interest to students of Israeli politics military studies Middle Eastern politics security studies and IR in general Stuart Cohen is a senior research associate of the BESA Begin Sadat Center for Strategic Studies and also teaches political studies at Bar Ilan University Israel His most recent book is *Israel and its Army From Cohesion to Confusion* Routledge 2008 **Criminal Jurisdiction over Armed Forces Abroad** Rain Liivoja, 2017-09-28 Rain Liivoja explores why and to what extent armed forces personnel who commit offences abroad are prosecuted under their own country's laws After clarifying several conceptual uncertainties in the doctrine of jurisdiction and immunities he applies the doctrine to the extraterritorial deployment of service personnel Comparing the law and practice of different states the author shows the sheer breadth of criminal jurisdiction that countries claim over their service personnel He argues that such claims disclose a discrete category of jurisdiction with its own scope and rationale which can be justified as a matter of international law By distinguishing service jurisdiction as a distinct category the analysis explains some of the peculiarities of military criminal law and also provides a basis for extending national criminal law to private military contractors serving the state This book is essential for scholars and practitioners in international and criminal law especially in military contexts The ISA Handbook in Contemporary Sociology Ann Denis, Devorah Kalekin-Fishman, 2009-05-22 Representing the fruit of in depth dynamics it invites us to give all necessary attention to the concepts of conflict cooperation and competition By reflecting on the possible articulations of these concepts and attempting to apply them in diverse fields of social science the editors give voice to those who are studying the world as it is and perform the service of returning a set of concepts approaches or paradigms to their legitimate place Michel Wieviorka President International Sociological Association This ISA Handbook presents and tracks the transformation of the

societies and social relations that characterize the twenty first century The volume is organized around a conceptualization of three processes that are fundamental to the analyses of micro meso and macro social relations conflict competition and cooperation In addition to chapters that delve into sociological theory case studies and overviews of subfields discuss and contextualize debates from an international perspective incorporating relevant material about North America Latin America Europe Africa and Asia Chapters on topics and fields crucial to the experience of people around the world include among others childhood studies consumption hunger labour studies peace keeping law health sport and welfare Systematic and informed the handbook will serve readers in all branches of the social sciences providing both experienced researchers and novices with the materials to explore the different domains of contemporary life *Das Militär in der Postmoderne -*
