Postnatal Depression Families In Turmoil:

Motherhood and Postnatal Depression Carolyn Westall, Pranee Liamputtong, 2011-07-21 Globally postnatal depression PND is a growing public health problem PND affects 10 to 15% of women in Western society It caused by a combination of biological psychological and social factors Two models have attempted to define and explain PND the biomedical and the sociological models The traditional biomedical model views PND as a medical condition which implies there is individual pathology and abnormality Whilst the biomedical model has been the dominant model in treating PND it has been criticized by feminist sociologists and psychologists for its rigidity in defining and explaining PND In contrast the psychosocial model of health acknowledges the biological factors that impact on emotional well being but places more emphasis on the personal and social factors that impact on emotional well being but places more emphasis on the personal and social factors that contribute to depressive symptoms such as gender poverty social disadvantage and social class The central argument throughout this book is the importance of support before and after the birth for women s emotional well being This book will also include women s journeys through pregnancy childbirth motherhood postnatal depression and resolution To date literature has focused on women s lived experiences of PND rather than their personal journeys through pregnancy childbirth and early motherhood Additionally the adjustment to fatherhood has received less attention For example little is known about the impact of postnatal depression on the partner what support partners offer when women with the intention to fill the gap in knowledge of cultural and social issues relating to pregnancy childbirth and motherhood for woman who were diagnosed with and had resolved PND

Dying for a Cure Rebekah Beddoe, 2011-08-31 A powerful memoir of antidepressants misdiagnosis and madness There was that term again depression being tossed around When had I received an official diagnosis anyway It had just been mentioned by my GP and now staff were picking it up and running with it Things seemed to be getting blown out of proportion I wanted to know why I couldn t be tested for this so called imbalance in my brain before being put on medication but I didn t want him to think I was

questioning his expertise He was the second doctor now to recommend the treatment And these are the newer sort the ones that aren't addictive or anything Not addictive They're very safe Shortly after the birth of her daughter Rebekah Beddoe was diagnosed with postnatal depression Two years later she was taking six different drugs including lithium a tranquilliser an antipsychotic and antidepressants She had been diagnosed with bipolar disorder given electric shock therapy made numerous attempts on her life and was alternately manic and consumed by crippling despair during which she could barely move She had a two-year-old daughter she hardly knew and a mother and partner who were at their wits' end unable to recognise the formerly ambitious vibrant and highly successful woman they loved Australians have embraced antidepressants twelve million prescriptions are written annually mostly by GPs But what do we really know of the pills' effects The idea that they correct a chemical imbalance in our brain is by no means proven there is much evidence that contradicts this view It is commonly thought such drugs are not addictive in fact as Rebekah found to her great distress they are hard to come off and those who do may suffer debilitating side effects This is a powerful memoir of the nightmarish three years Rebekah endured as she was repeatedly misdiagnosed only to realise that her medication was the cause of her mental deterioration Rebekah calls for better information from the pharmaceutical companies about the risks associated with antidepressants and similar classes of drugs facts rather than marketing dressed up as medical science and for a re-examination of the ways some psychiatrists treat their patients
