Potential Effect Of Two New Biotechnologies On The World Dairy Industry:

The Potential Effect Of Two New Biotechnologies On The World Dairy Industry Lovell S Jarvis, 2019-07-11 Biotechnology is expected by many observers to have a significant impact on the world dairy industry over the next decade In this timely volume Lovell Jarvis analyzes the potential effect of two biotechnologies multiple ovulation and embryo transfers MOET and recombinant bovine somatotropin rbST on the dairy industry around the world According to Jarvis s research the effects of these two technologies will vary greatly between the developed and developing nations He predicts that the technologies will be most profitable for the developed nations where their use will increase milk production and strengthen their positions in dairy export markets Developing country dairy sectors will probably lose from the use of these two biotechnologies as their own international trade position will be weakened though their own consumers should benefit Jarvis concludes his study with a look at alternative approaches that might improve the competitive position of developing countries in the dairy sector

Applications of Gene-Based Technologies for Improving Animal Production and Health in Developing Countries Harinder P.S. Makkar, Gerrit J. Viljoen, 2005-12-27 Modern Biotechnology has potential for solving many problems associated with animal productivity and health and offers exciting opportunities for enhancing agricultural productivity At present the focus is however on the issues and problems of significance for livestock producers in the developed world In order to fully realize the benefits of this technology in developing countries there is a need to identify characterize and apply appropriate gene based technologies for these regions These proceedings present peer reviewed state of the art papers describing the achievements in the areas of animal breeding and genetics animal nutrition animal health and environment ethics safety and regulatory aspects of gene based technologies achievements which could be realized using these modern scientific tools to maximise the benefits from the livestock revolution that is taking place and the constraints in the use of gene based technologies and their specific research needs This book will help in bridging the wide gap between developed and developing countries in the development and use of gene based technologies and to elucidate the current and future roles of such technologies in the developing world It is a good reference source for researchers students and policy makers alike

Milk-- Beyond the Dairy Harlan Walker, 2000 This is the seventeenth volume of the ongoing series of papers delivered at Oxford Symposium on Food Cookery the longest running food history conference in the world The subject revolves around milk and milk products their uses in food and cookery through the ages and as important their substitutes This broad definition gives rise to a very wide range of essays and studies Berichte über Landwirtschaft, 2000 **Potential**

Impacts of Crop Biotechnology in Developing Countries Matin Qaim, 2000 Crop biotechnology could boost global food production in a sustainable way However the economic repercussions of biotechnology for developing countries are largely unknown and have been the subject of acute controversy over the last few years This study deals with the topic and provides some preliminary empirical results An analytical framework for the ex ante evaluation of biotechnology in smallholder

agriculture is developed which is then used within three different case studies in Kenya and Mexico It is shown that biotechnology holds great potentials for poor agricultural producers and consumers Yet appropriate institutional adjustments are required to capitalize on these potentials Implications for national and international biotechnology policies are discussed
