Tata, 2012-06-14 The Poverty of Nations is a study about the status and trends in human well being as it varies from nation to nation worldwide A basic premise is that human well being comes from a nation's physical social economic and political macro systems A metric of descriptive statistics is built for each system and then it is aggregated into one metric to gauge the level of human well being in each nation The metric describes human well being in 1960 and 2010 to seek an understanding of the status and trend of human well being in 151 of the world's nations Which nations are meeting the United Nations Millennium Development goals and which are not      **The Poverty of Nations** A. Khusro, 1999-08-26 The Poverty of Nations demonstrates that poverty remains a universal phenomenon even as most parts of the world see increases in affluence of varying degrees Cutting across the globe the study focuses on 24 countries including the industrialised economies planned economies developing market economies mixed economies and the least developed economies Professor Khusro examines the causes of poverty and of development the impact of colonialism and the industrial revolution and policies for reducing global poverty today Theoretical questions of measuring poverty are allied to historical and contemporary analysis      **The Poverty of Nations** Robert J. **Poverty of Nations** Dr Subhrendu Bhattacharya, 2015-01-16 The book deals with the concept of poverty its causes and cures The rich ordinarily blaming the poor that latter remain poor because of their being lazy and the poor feeling that their poverty arises from the exploitation by the rich both views have been attempted to be dismantled The dichotomy of poverty and the affluence has not been an age old phenomenon The inequalities in the non industrial ages were far from being distinct except an extremely thin layer of the royalty and the feudal With prosperity of few nations arising from industrial revolution from the middle of the 1700s and the increased naval power of a few nations made the difference between the rich and poor regions and between the countries sharp As money begets money the economic development too followed the same

path The author examined how the poverty got accentuated by migration of labour and the rich engaging them on security of contract basis for longer periods either paying measly compensation or with no wages They also restricted their mobility to leverage from their cheap labour This is reflected even in the new millennium in the form of denial of industrial democracy by some gigantic corporations to annihilate the bargaining power of the labour The book also mentions how disengaged nature of the democratic politics of the poor in the developed world kept them poorer and wanting in confidence Remedial measures have also been discussed in this study which as stressed by the author need to be continent specific rather than one cloth size fits all approach of the multilateral Institutions The book has not examined and researched poverty as one blanket entity but researched poverty at multi layered level and at each level the author got to the bottom of the issue and provided unique solutions The study suggests need for a gesture of benevolence of the developed world keeping in mind the downsides that resulted from colonization The book goes into the question of emergence of avoidance of practical education science and engineering education lack of interest in academic rigour in several industrial countries in the recent years which could be heavily challenging for future generations The book is unique in its dealing with remedial measures to which the book has considerably dedicated
