Poverty Policy And Poverty Research The Great Society And The Social Sciences:

Poverty Policy and Poverty Research Robert H. Haveman, 1997-05-15 The War on Poverty instituted in 1965 during the administration of Lyndon B Johnson was one of the chief elements of that president's Great Society initiative This book describes and assesses the major social science research effort that grew up with and in part because of these programs Robert H Haveman's objective is to illuminate the process by which social and political developments have an impact on the direction of progress in the social sciences Haveman identifies the policy measures most closely tied to the War on Poverty and the Great Society and describes the nature of these policies and their growth from 1965 to 1980 He examines the extent and growth of resources devoted to the poverty related research that accompanied these programs and assesses the impact of the growth in this research commitment over the 1965-1980 period Haveman's was the first full overview of recent poverty related research and an overview of methodological developments in the social sciences in the post 1965 period which were stimulated by the antipoverty effort

Global Poverty Law Moniza Rizzini Ansari, 2024-09-30 This book demonstrates how the various legal efforts employed to eradicate global urban poverty also play a significant role in shaping it Urban poverty has been widely examined as a social problem that requires attention and social commitment Law is often seen as both an important contributor to the problem as well as a source of crucial tools to overcome it In spite of this however poverty is surprisingly disregarded within legal scholarship This book counters this by drawing on legal theory legal history and legal geography to inquire how urban poverty is made visible and invisible as a problem across global cities More specifically it investigates the mechanisms and networks through which global urban poverty has been conceptually and materially shaped in a way that fits the remit of global corporate philanthropy and the development aid agenda By following law's circuitous interactions with poverty knowledge and antipoverty interventions the book demonstrates how it plays a historical role in making poverty seen known and remedied As a result the book argues law consolidates a stable image of poverty as an essential problem to be uniformly found worldwide and so reasonably fixable with the appropriate legal reforms Taking poverty to be a fundamental manifestation of social injustice the book thus raises key questions about the role of law in the achievement of social justice This innovative and insightful account of the relationship between law and poverty will appeal to scholars in critical and socio legal studies as well as others working in poverty studies urban studies development studies geography sociology and social policy

The "Underclass" Debate Michael B. Katz, 2018-06-05 Do ominous reports of an emerging underclass reveal an unprecedented crisis in American society Or are social commentators simply rediscovering the tragedy of recurring urban poverty as they seem to do every few decades Although social scientists and members of the public make frequent assumptions about these questions they have little information about the crucial differences between past and present By providing a badly needed historical context these essays reframe today's underclass

debate Realizing that labels of social pathology echo fruitless distinctions between the deserving and undeserving poor the contributors focus not on individual and family behavior but on a complex set of processes that have been at work over a long period degrading the inner cities and inevitably the nation as a whole How do individuals among the urban poor manage to survive How have they created a dissident infrapolitics How have social relations within the urban ghettos changed What has been the effect of industrial restructuring on poverty Besides exploring these questions the contributors discuss the influence of African traditions on the family patterns of African Americans the origins of institutions that serve the urban poor the reasons for the crisis in urban education the achievements and limits of the War on Poverty and the role of income transfers earnings and the contributions of family members in overcoming poverty The message of the essays is clear Americans will flourish or fail together

Katz, 2012-05-25 At 1 27 on the morning of August 4 2005 Herbert Manes fatally stabbed Robert Monroe known as Shorty in a dispute over five dollars It was a horrific yet mundane incident for the poor heavily African American neighborhood of North Philadelphia one of seven homicides to occur in the city that day and yet not make the major newspapers For Michael B Katz an urban historian and a juror on the murder trial the story of Manes and Shorty exemplified the marginalization social isolation and indifference that plague American cities Introduced by the gripping narrative of this murder and its circumstances *Why Don t American Cities Burn* charts the emergence of the urban forms that underlie such events Katz traces the collision of urban transformation with the rightward moving social politics of late twentieth and early twenty first century America He shows how the bifurcation of black social structures produced a new African American inequality and traces the shift from images of a pathological black underclass to praise of the entrepreneurial poor who take advantage of new technologies of poverty work to find the beginning of the path to the middle class He explores the reasons American cities since the early 1970s have remained relatively free of collective violence while black men in bleak inner city neighborhoods have turned their rage inward on one another rather than on the agents and symbols of a culture and political economy that exclude them The book ends with a meditation on how the political left and right have come to believe that urban transformation is inevitably one of failure and decline abetted by the response of government to deindustrialization poverty and race How Katz asks can we construct a new narrative that
