Poverty, Inequality, and Evaluation Ray C. Rist, Frederic P. Martin, Ana María Fernández, 2015-10-15 The basic premise of this book is that the conversation on the future of development needs to shift from a focus on poverty to that of inequality The poverty emphasis is in an intellectual and political cul de sac It does not address the fundamental question of why people are poor nor what can be done structurally and institutionally to reduce and eliminate it The various chapters illustrate in the context of various countries and sectors around the world the significant contributions that evaluators can make in terms of improvement of the analytical framework analysis of the performance and results of specific programs and projects as well as assessing and designing better public management systems in terms of poverty and inequality reduction Beyond the specific contributions presented three characteristics characterize those evaluations to be relevant for poverty and inequality analysis a global local approach Global to move beyond disciplinary boundaries and consider cross cutting issues local to account for the diversity of countries sectors institutions and cultures considered a problem solving orientation The issue evaluated is the core focus and determines the choice of evaluation methods to analyze this issue from a variety of angles an evolutionary approach Chapters presented are from iconoclasts who do not have any pre established theory or school of thought to defend This is the result of openness of mind and ability to adapt the analytical framework the evaluation methods and the interpretation of results in a constant interaction with the stakeholders Such characteristics make evaluation a domain that can help understand better complex issues like poverty inequality vulnerability and their interactions as well as propose a relevant and useful theory of change for public policies and projects to improve the plight of a large part of the world population in industrialized and developing countries alike

The End of Poverty Peter Edward, Andy Sumner, 2019-04-23 In this book Edward and Sumner argue that to better understand the impact of global growth on poverty it is necessary to consider what happens across a wide range of poverty lines Starting with the same datasets used to produce official estimates of global poverty they create a model of global consumption that spans the entire world's population They go on to demonstrate how their model can be utilised to understand how different poverty lines imply very different visions of how the global economy needs to work in order for poverty to be eradicated

Gary S. Fields,1980-12-31 Economists have traditionally concentrated on aggregate economic growth to measure a country s development but previously they have also considered income distribution performance In this book Gary Fields reverses conventional approaches by using income distribution as the primary indicator He examines what is known about the distribution of income and poverty inequality and development He explores the main causes of poverty and inequality and the extent to which they have been reduced by individual countries in the course of their economic growth Recognizing that conclusions vary with the type of income distribution measure used Fields proposes that changes in absolute poverty be adopted as the primary index of a developing nation s progress and suggests that the growth rate of the GNP and character of that growth be regarded as the principal determinants of the levels of poverty and inequality This framework calls for new models new data and new microanalytic techniques in order to understand the results of development efforts Fields employs evidence from case studies of six developing nations to suggest some explanations for differing patterns of development and calls for development planning founded on a firm commitment to helping the poor

Philosophical Approaches to Poverty, Inequality and the Idea of Wellbeing Francesca Malloggi, 2017-12-22 Master's Thesis from the year 2017 in the subject Philosophy Practical Ethics Aesthetics Culture Nature Right grade 8 University of Amsterdam language English abstract There are many definitions of poverty in a legal and philosophical sense coming from many different institutions such as the UN EU individual countries and from many different philosophers In the following work I will suggest that we should analyze poverty and broaden the meaning together with the way of measuring it especially adopting Amartya Sen's approach For the moment when discussing poverty I will refer to the definition given by A Dictionary of Sociology 2009 in which poverty is a state in which resources usually material but sometimes cultural are lacking Scott and Marshall 2009 I aim at suggesting that my analysis of relative poverty shall be taken into account not only for social and economic policies but also when dealing with issues about absolute poverty because the quality of people's life has to be determined with broader terms when speaking about developed countries indeed as I will show in the course of the thesis because having a full time job can still be related to a deprived situation for the human being and even though the deprivation of the persons can be more or less severe regarding relative and absolute poverty the level of suffering of the human being is still very high and therefore it requires attention and more sensitivity Poverty and inequality are deeply interconnected and they can be broadly defined as the functioning and the outcome of the same system the economic system based on capitalism Poverty is functional for the capitalist system because it serves as lubricants greasing the joints of an otherwise creaky social system Wachtel 1972 pg 17 Poverty plays a functional part within this system as it is about the increased value of the real income of people that fall shortly above the line of the non poor and it works as an illusion of a given state of affairs Also the level of poverty allows the non poor to buy commodities at lower prices and from this point of view we are all served by the existence of poverty Moreover the second function regards the general conditions created by poverty because it ensures that the dirty work Wachtel 1972 will be done such as dangerous precarious underpaid and undignified jobs Poverty allows for the formation of a labor force people who need to work whatever the physical and metaphorical costs are

Poverty, Inequality, and Democracy Francis Fukuyama, Larry Diamond, Marc F. Plattner, 2012-03 The rise of populism in new democracies especially in Latin America has brought renewed urgency to the question of how liberal democracy deals with issues of poverty and inequality Citizens who feel that democracy failed to improve their economic condition are often vulnerable to the appeal of political leaders with authoritarian tendencies To counteract this trend liberal democracies must establish policies that will reduce socioeconomic disparities without violating liberal principles interfering with economic growth or ignoring the consensus of the people Poverty Inequality and Democracy addresses the complicated philosophical and moral issues surrounding the distribution of economic goods in free societies as well as the empirical relationships between democratization and trends in poverty and inequality This volume also discusses the variety of welfare state policies that have been adopted in different regions of the world The book's distinguished group of contributors provides a succinct synthesis of the scholarship on this topic They address such broad issues as whether democracy promotes inequality the socioeconomic factors that drive democratic failure and the basic choices that societies must make as they decide how to deal with inequality Chapters focus on particular regions or countries examining how problems of poverty and inequality have been handled or mishandled by newer democracies in Latin America Eastern Europe Africa and Asia Poverty Inequality and Democracy will prove vital reading for all students of world politics political economy and democracy's global prospects Contributors Dan Banik Nancy Bermeo Dorothee Bohle Nathan Converse Alberto Diaz Cayeros Francis Fukuyama Bela Greskovits Stephan Haggard Ethan B Kapstein Robert R Kaufman Taekyoon Kim Huck Ju Kwon Jooha Lee Peter Lewis Beatriz Magaloni Mitchell A Orenstein Marc F Plattner Charles Simkins Alejandro Toledo Ilcheong Yi

Poverty Chukwuma Agu, 2015 Poverty reduction and inequality are undeniably the buzz issues of the millennium And where else would one go to understand the dynamics and paradoxes they raise for policies other than Africa the continent historically synonymous with poverty until recently when chants of Africa rising seem to have replaced mourning for the dark continent Humongous resources have been dedicated to policy research and intervention programmes and projects to reduce poverty and inequality with Africa and South Asia getting more than their fair shares But while everyone agrees that something is amiss with the input output ratio of efforts aimed at poverty reduction these efforts continue unquestioningly This book is borne out of the need to question that missing link It sets out to examine contents contexts and interventions The work begins with continent wide evidence on Africa examining the rising penury in the midst of abundant endowments and growth The conclusion that the authors have come to something is not right with definitions measurements and policy measures for tackling poverty across the land Country experiences Nigeria Cameroon Australia and the United States also agree with the position that poverty reduction seems to raise indifferent to the broad policy environment within which it thrives This book shows why poverty may not have been responsive to growth in developing countries in recent years It examines outcomes of policies and

insists that poverty inequality and reduction strategies need not only be context specific but should involve much more than just narrow interventions If therefore you are interested in questioning conventional positions about poverty and inequality this book is for you *Poverty, Inequality and Income Distribution in Comparative Perspective* Timothy M.

Lloyd, Oliver Morrissey, 1994-07-12 Poverty alleviation is a major objective of development More than a fifth of the world's population lives in absolute poverty and the majority of the poor live in rural areas This volume studies what can be done for alleviating rural poverty Four chapters address the measurement of poverty and inequality including the use of household expenditure surveys and intra household income distribution Evidence is presented for India Mauritania Côte d'Ivoire and China Other chapters present case studies on strategies for rural development provision of rural credit in Bangladesh and India technical change in Philippine agriculture contract farming in Thailand and banana growers in the Windwards The contributions introduce the problems of rural development and show that effective rural development is assisted by investment in education and secure access to credit that equity is important for incentives but not directly related to poverty and that technical and institutional reform are essential but require careful design and implementation Poverty,

Inequality, and Unemployment in India Kedar Nath Prasad, 1993 **A More Equal Society?** John Hills, Kitty

Stewart, 2005-01-12 As the Labour government approaches the end of its second term in office there is a need to assess the welfare issues that have been put into place and examine what has been achieved Poverty Inequality and Exclusion brings together the expertise of a range of authors to provide this evaluation **Breadline Europe** Gordon, David, Townsend,

Peter, 2000-12-27 The governments of 117 countries agreed at the World Summit on Social Development to prepare annual national anti poverty plans Two measures in particular were recommended for absolute and overall poverty This book examines poverty in Europe within this agreed international framework
