Poverty In Albania:

Poverty in Albania Hermine de Soto,2002-01-01 Annotation During the ten years of reform Albania has been buffeted by set backs which led fully 40% of respondents to indicate that socioeconomic conditions have worsened during that period While informal coping mechanisms have been developed in many communities these are under stress and threaten to give way **Albania** Weltbank,2013 Despite the impressive performance of the economy in the last five years however poverty in Albania has remained high and per capita income at around US 1 230 in 2002 has remained one of the lowest among transition economies In an effort to adopt policies to share widely the benefits of growth and reduce poverty the Government outlined a poverty alleviation strategy in the 2000 Interim Poverty Reduction Strategy Paper I PRSP and developed it in detail two years later in the Growth and Poverty Reduction Strategy GPRS the precursor to the current National Strategy for Socio Economic Development NSSD However in recognition of the data limitations the first round of a five year Living Standards Measurement Survey LSMS program was launched in 2002 This survey provides valuable information on a variety of issues related to living conditions in Albania including details on income and non income dimensions of poverty in the country and forms the basis of the present assessment of poverty in Albania The poverty line used for this assessment is the first absolute poverty line based on nationally representative household level expenditure data ever estimated for Albania and is based on an actual consumption data Poverty in Albania has marked spatial and regional dimensions with rural areas and the Mountain region being consistently poorer than rest of the country stipulating the depth of poverty in the Mountain area is much more pronounced than in any other region with a poverty gap index of over 11 percent The study reviews the determinants of poverty through the main characteristics of poor households and labor market characteristics of the poor noting widespread unemployment rate in urban areas It then examines the non income dimensions of poverty health and education inequalities and reviews the role of social transfers determining pensions and remittances from Albanian relatives are the largest sources of transfer income The results of the analysis point priority areas namely that coverage under health insurance needs to be increased secondary school enrollments need to be increased and quality of education at this level improved provision of basic services and infrastructure should be improved including access to quality health and education services and to basic sanitation services and it is imperative that the Government develops a rural development strategy focused on poverty reduction in the short run s The SAGE Encyclopedia of World Poverty Mehmet Odekon,2015-06-15 The SAGE Encyclopedia of World Poverty Second Edition addresses the persistence of poverty across the globe while updating and expanding the landmark work Encyclopedia of World Poverty originally published in 2006 prior to the economic calamities of 2008 For instance while continued high rates of income inequality might be unsurprising in developing countries such as Mexico the Organization of Economic Co operation and Development OECD reported in May 2013 even countries with historically low levels of income inequality have experienced significant increases over the past decade

including Denmark Sweden and Germany The U N and the World Bank also emphasize the persistent nature of the problem It is not all bad news In March 2013 the Guardian newspaper reported Some of the poorest people in the world are becoming significantly less poor according to a groundbreaking academic study which has taken a new approach to measuring deprivation The report by Oxford University s poverty and human development initiative predicts that countries among the most impoverished in the world could see acute poverty eradicated within 20 years if they continue at present rates On the other hand the U N says environmental threats from climate change could push billions more into extreme poverty in coming decades All of these points lead to the need for a revised updated and expanded edition of the Encyclopedia of World Poverty Key Features 775 evaluated and updated and 175 entirely new entries New Reader s Guide categories Signed articles with cross references Further Readings will be accompanied by pedagogical elements Updated Chronology Resource Guide Glossary and thorough new Index The SAGE Encyclopedia of World Poverty Second Edition is a dependable source for students and researchers who are researching world poverty making it a must have reference for all academic libraries

Non-income dimension of poverty in Albania Instituti i Statistikës. Tiranë,2005 Albania International Monetary Fund,2003-06-16 This paper examines the Progress Report for Albania s National Strategy for Socio Economic Development NSSD 2002 was the first year of implementing the NSSD The implementation process has been oriented toward achieving the annual objectives and in accordance with the program of public priority measures for 2002 04 The experience gained in NSSD implementation the definition and improvements to objectives and medium term NSSD measures the Millennium Development Goals and Albania s European integration objectives have all contributed to further improvements of the vision and medium and long term NSSD objectives **Albania, Poverty Reduction Strategy Paper Annual Progress Report** ,2003 The Poverty Reduction Strategy Initiative William G. Battaile,Steve Kayizzi-Mugerwa,World Bank. Operations Evaluation Department,International Monetary Fund. Independent Evaluation Office,2005 This book provides an independent assessment of the Poverty Reduction Strategy Initiative for the World Bank as well as the broader development community It offers a in depth review of the progress thus far with particular focus on the role and effectiveness of the Bank s support drawing from extensive discussions with national stakeholders in Poverty Reduction Strategy PRSP countries research and analytical work and country case study reports on ten PRSP countries Albania Cambodia Ethiopia Guinea Mauritania Mozambique Nicaragua Tajikistan Tanzania and Vietnam The author of The Poverty Reduction Strategy Initiative concludes that the Initiative has led to improvements in national strategies and processes in some low income countries such as an increased poverty focus a higher profile for monitoring results and better donor government dialogue However the contribution to broad poverty reduction especially in more difficult country environments is largely in jeopardy without significant changes The author argues that the Initiative should be reoriented toward improving domestic processes and less on completion of documents customizing the approach to particular country circumstances filling analytical gaps to better

understand which actions will provide the greatest poverty pay off and making sure the assistance programs of external partners are anchored in the country's poverty reduction strategy *Progress Report for Implementation 2002* International Monetary Fund, Albania. Këshilli i Ministrave, 2003 *HIV/Aids in the Western Balkans*, 2005-01-01 In recent years Europe and Central Asia has experienced the world's fastest growing HIV AIDS epidemic Yet in the Western Balkan countries the HIV prevalence rate is under 0.1 percent which ranks among the lowest This may be due to a low level of infection among the population or partly due to inadequate surveillance systems All major contributing factors for the breakout of an HIV AIDS epidemic are present in the Western Balkans HIV AIDS disproportionately affects youth 80 percent of HIV infected people are 30 years old or younger Most of the Western Balkan countries have very young populations

Human capital and poverty reduction in Albania Meleq Hoxhaj, 2017-01-11 Master's Thesis from the year 2016 in the subject Economics Case Scenarios grade 10 University Of Vlora Ismail Qemali language Albanian abstract The purpose of this paper is to analyze poverty human capital and the relationship between them in Albania Poverty is among the main problems of the world economy and poverty reduction today is considered as the main objective of the new millennium Poverty in Albania grew after the 1990s We had the following years of poverty reduction but in recent years we have again a slight increase When analyzing data from the World Bank and other sources by linear regression it appears that the rate of enrollment in primary education has a negative effect on GDP per capita while there are positive correlations for GDP per capita and the rate of enrollment in secondary education This paper suggests that in order to enable the reduction of poverty we need a greater involvement of the poor in the economy and increase the quantity and quality of human capital in Albania *Albanian Observer*, 2001 Identifying Household Level Determinants of Poverty in Albania Using Logistic Regression Model Elena Myftaraj (Tomori), 2014 The general goal of this paper is to analyze poverty in household per capita consumption as a monetary measurement and based in the data from Albania trying to identify probable determinants that influence in falling in a trap of poverty Current literature suggests several ways of modeling the determinants of poverty Usually the regression analysis is used to check in the same time the influence of the different factors In this paper binary logistic regression was estimated with economic status poor non poor as dependent variable and a set of characteristics of individual and household as independent variables The logistic model used shows that probability of being poor is found to be influenced mainly by education and status of employment of household head the household composition and geographic divisions

Albania: Poverty Reduction Strategy Paper Annual Progress Report International Monetary Fund, 2004-07-21 This Progress Report reviews implementation of Albania's National Strategy for Socio Economic Development NSSD during 2003 The report is primarily orientated toward the vitalization and harmonization of mid term and long term development objectives the principle of further prioritization of public measures the real costing of priority public measures and the extension of Albanian ownership of NSSD The report also offers an improved mid term vision and serves as a starting point for a long

term visionary process based on credible and realistic analyses *Foreign Operations, Export Financing, and Related Programs Appropriations for 2004* United States. Congress. House. Committee on Appropriations. Subcommittee on Foreign Operations, Export Financing, and Related Programs, 2004 A Qualitative Assessment of Poverty in 10 Areas of Albania, 2001 This qualitative assessment of poverty in Albania seeks to deepen the understanding of poverty in the country first by involving poor Albanians in a process of exploring the causes nature extent of poverty and how it affects their livelihoods Second it is intended to support the Growth and Poverty Reduction Strategy Paper PRSP third it supports preparation of the Country Assistance Strategy CAS and the Living Standards Measurement Survey LSMS process and fourth it supports ongoing research on formal and informal institutions in the country that are relevant to poverty and it identifies as well emerging areas of concern Findings suggest that poverty in the study sites developed as a result of a weak economic base at the beginning of reform as of 1990 worsened as the reforms continued and accelerated during the 1997 financial crisis From household interviews it is perceived that the causes of poverty are a result of unemployment insufficient and low quality of land absence of formal institutions and marketing mechanisms to support industrial and agricultural development and the government s inability to respond to infrastructure and basic needs The study further examines the factors depressing and or precluding sector wide the potential to compete sustain livelihoods attain employment and receive economic and social assistance And it rightly identifies the contribution from migrant remittances accounting for a significant percentage of GDP Policy implications spell out the need to improve administration of social security and services by decentralizing legal and regulatory frameworks and equitably mobilizing fiscal revenues **Albania**, 2006 108-1 Hearings: Foreign Operations, Export Financing, and Related Programs Appropriations For 2004, Part 1C, 2003, *, 2003 **108-1 Hearings: Foreign Operations, Export Financing, and Related Programs Appropriations For 2004, Part 1B, 2003, *, 2003 *Poverty, Urbanity and Social Policy* Jolanta Aldukaite, 2009 The aim of this book is to provide the reader with the broad spectrum of poverty and social policy issues in Central and Eastern Europe and address the most urgent topics of welfare state research namely poverty children and social policy gender social policy and poverty urban policy renewal and poverty and overall challenges to social policy reform The book demonstrates that despite an increase in poverty and inequalities in many Central and Eastern European countries during the last 18 years the social policy systems have not experienced a radical dismantlement throughout the entire region The post Communist welfare state still shows more comprehensive solutions to social problems than residual ones Nevertheless the deteriorated fiscal capacities of the state in some cases hinder the successful poverty solutions as well as the expansion of the welfare programmes Yet the Central and Eastern European region is very diverse regarding the scope and depth of social problems encountered and some countries have implemented more successful policy solutions than other ones Furthermore the findings of this volume demonstrate that Central and Eastern European countries are not so dramatically distinct from Western Europe neither in their social problems**

encountered nor in their solutions Nevertheless the experience of the socialist regime the relatively lower wages and lower social benefits as well as the higher share of GDP produced in a shadow economy allow the CEE countries to group into the distinct post Communist regime
