Welfare Law Lucy A. Williams, 2020-11-25 This title was first published in 2001 Welfare law is a legal field integral to most jurisprudential formulations whether artificially designated as doctrinal theoretical or practical At its core legal discourse regarding welfare challenges the formulations traditionally viewed as pre legal the background rules of property tort and contract law In addition it affects a large percentage of the world s population highlights the social construction of identities and perhaps more than any other area of law graphically epitomizes the intersection of class race and gender distinctions However within both the legal academy and practice welfare law has been marginalized and viewed as a field that does not connect to any but a small sector of lawyers and legal clients Isolated as an arcane domain of either statutory and regulatory legal minutiae or jurisprudential insignificance welfare law has never realized its potential as a major hub for legal theoretical discourse The articles in this volume seek to expose the roots of the essentialized view of welfare law as nonessential and re establish its value and importance

Why Should it Matter that Others Have More? - Poverty, Inequality and the Potential of International Human Rights Law Margot E. Salomon, 2011 A concern with ensuring minimum standards of dignity for all and a doctrine based on the need to secure for everyone basic levels of rights have traditionally shaped the way in which international human rights law addresses poverty Whether this minimalist non relational approach befits international law objectives in the area of world poverty begs consideration This paper offers three justifications as to why global material inequality and not just poverty should matter to international human rights law The paper then situates requirements regarding the improvement of living conditions a system of equitable distribution in the case of hunger and in particular obligations of international cooperation within the post 1945 international effort at people centred development The contextual consideration of relevant tenets serves to demonstrate that positive international human rights law can be applied beyond efforts at poverty alleviation to accommodate a doctrine of fair global distribution
