The Water, Energy, and Food Security Nexus in Asia and the Pacific Zafar Adeel,Benno Böer,2024-08-03 This open access book considers that the Central and South Asian region sits at the middle of geographical geopolitical economic and historical cross roads Since the independence of the Central Asian states in the 1990s following the demise of the Soviet Union and emergence of regional trade and political ties means that the region s evolution has also been subject to common drivers external and internal opening up some new opportunities The long term social and economic success of the region depends on how water energy and food security is achieved at a regional scale that combines Central Asia and South Asia which are typically treated separately in policy and scholarly works This book considers how securing the Nexus of water energy and food resources serves as a starting point for utilizing emerging region wide opportunities It does so by identifying the present state of play deeply analyzing cross cutting drivers e g climate change poverty environmentalcrises and urbanization and offering insights into possible solutions The book offers an in depth rationale for why dealing with this region as a whole makes sense it is then divided into four sections The first section entitled A Regional Overview establishes the basic facts around the state of water energy and food resources this section is meant to serve as the foundation upon which further exploration and analysis is built The second section turns its attention to Regional Issues and

unpacks the Nexus into water energy and water food relationships It also investigates how regional trade and coping mechanisms for environmental crises might inform the policies on the Nexus The section includes a sampling of success and failure stories around implementation of the Nexus policies and strategies in the Central and South Asian region The third section undertakes an analysis of the Cross Cutting Themes for Nexus Security by investigating all the major drivers of policy and development strategies in the region climate change urbanization poverty sharing of resources across borders and gender based disparities The fourth and final section uses the discussion throughout the book to formulate An Integrated Narrative around the Nexus It explores how the new global development framework in the form of Sustainable Development Goals might offer a new perspective for achieving the Nexus security in the region There is an argument that the Nexus security ties in with achievement of long term peace and security A final wrap up chapter gazes into the crystal ball to test out some future scenarios both positive and negative

Movement, Power and Place in Central Asia and Beyond Madeleine Reeves,2013-09-13 Central Asia is a region singularly marked by attempts to transform social life by transforming place Drawing together established scholars and a new generation of historians geographers and anthropologists this volume brings empirical specificity and theoretical depth to debates about the politics of place making in this diverse region making an important contribution to Central Asian studies and a distinctive regional comparison to the spatial turn in social analysis Case studies draw on archival research and oral history to explore the workings and unintended consequences of policies aimed at sedentarizing collectivizing and resettling populations as a means to fix and territorialize space The book also examines ethnographic studies attuned to the role of movement in sustaining social life from Soviet era trade networks that linked rural Central Asia and the Russian metropolis to pilgrimage routes through which kazakhness is articulated to the contemporary moralization of migration abroad in search of work Rather than analysing flows as abstract processes the book enquires about effortful activity material infrastructures political relations and social habits through which people ideas knowledge skills and material objects move or are prevented from moving As such it offers new insights into the complex intersections of movement power and place in this important region over the last two centuries This book was originally published as a special issue of Central Asian Survey

India and Central Asia in the Post-Cold War Era Saroj Kumar Aryal,2024-11-29 This book analyses the evolution of India s foreign policy towards Central Asia after the end of the Cold War Focusing on the development of India s foreign policy towards Central Asia between 1991 and 2020 this book investigates the explanatory and intervening variables of the policy towards the region to identify its goals assumptions motivations and instruments The preliminary assumption is that India s foreign

policy towards Central Asia has evolved after the Cold War from a passive approach to an active participant in Central Asian security economic and socio cultural spheres This is also seen due to the emergence of the five Central Asian countries as independent states which have a tremendous strategic significance due to their geographical location huge hydrocarbon reserve and potential economic opportunities India expanded its policy to the Extended Neighbourhood adding East Central and West Asia to the existing South Asian neighbourhood Since then India has been engaging with the region considering the growing geostrategic and geo economic significance of the region and using the available foreign policy instruments This book presents a comprehensive assessment of India s foreign policy behaviour evolution with proper analysis of the explanatory external and intervening internal variables that influence India s behaviours towards the region It shows that India also aims to be a very influential power in Central Asia This book will be an excellent resource for students and researchers of area and global studies international relations Asian Politics and South and Central Asia The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *The Journal of Central Asian Studies* ,2010 **Political and Economic Trends in Central Asia** Shirin Akiner,1994 A comprehensive study of Soviet Central Asia covering politics education agricultural problems ethnic and demographic issues and the role of Islam in the region Recent political developments in the USSR are covered in the introduction in the context of the issues covered by the contributors

Symbolism and Power in Central Asia Sally Cummings,2013-09-13 With the collapse of communism post communist societies scrambled to find meaning to their new independence Central Asia was no exception Events relationships gestures spatial units and objects produced conveyed and interpreted meaning The new power container of the five independent states of Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan would significantly influence this process of signification Post Soviet Central Asia is an intriguing field to examine this transformation a region which did not see an organised independence movement develop prior to Soviet implosion at the centre it provokes questions about how symbolisation begins in the absence of a national will to do so The transformation overnight of Soviet republic into sovereign state provokes questions about how the process of communism turned nationalism could become symbolised and what specific role symbols came to play in these early years of independence Characterized by authoritarianism since 1991 the region s ruling elites have enjoyed disproportionate access to knowledge and to deciding what how and when that knowledge should be applied The first of its kind on Central Asia this book not only widens our understandings of developments in this geopolitically important region but also contributes to broader studies of representation ritual power and identity This book was published as a special issue of *Europe Asia Studies* **Encyclopaedic Ethnography of Middle-East and Central Asia** R. Khanam,2005 **Central Asia** Dr. S. M.
