Power And Conflict In A Mexican Community A Study Of Political Integration:

Power and Conflict in a Mexican Community Antonio Ugalde, 1970 *Corruption & Politics in Contemporary Mexico* Stephen D. Morris, 1991 This book addresses the causes effects and dynamics of political corruption in Mexico Systematic analysis of corruption is critical to a better understanding of the politics of Mexico and despite the many conceptual and methodological obstacles the importance of the subject matter demands treatment Morris s work should therefore be seen not as definitive but as an initial step in understanding a central dimension of Mexican politics Corruption as a topic of research invites certain misunderstandings as it is a broad concept conveying a variety of moral connotations This inquiry into political corruption is not intended to depict the Mexican people or society as any less or more moral than others The study draws on extensive content analysis of news reports from the Mexican press a public opinion poll conducted in 1986 and personal interviews The objective is not to expose scandals and wrongdoing by Mexican officials name names or point fingers it is an academic endeavor The author discusses scandals and gives examples of corruption for illustrative purposes but his analysis is more theoretical than anecdotal He questions whether in fact corruption has enhanced or diminished the stability of the Mexican government and examines the reasons for the failure of many anti corruption efforts **Elites and Economic Development** John Walton, 2014-09-10 This book is a detailed comparative analysis of development politics in four urban regions of Latin America two in Mexico and two in Colombia John Walton has based his studies on the assumption that the problems of economic growth are essentially political that is are problems of choice decision making and the exercise of power His fundamental purpose has been to discover how elites of different kinds are more and less successful in the promotion of economic development which he defines as a process in the organization of a society leading not only to higher levels of efficient output but also to a more equitable distribution of benefits At the time the four cities compared were the second and third largest metropolitan areas in each country Guadalajara and Monterrey in Mexico Medell n and Cali in Colombia This selection allows the author to pair across countries cases of early and large scale industrialization Monterrey and Medell n with cases of more recent industrial growth in agricultural commercial centers Guadalajara and Cali Walton presents historical introductions to each of the regions and integrates these with original fieldwork and interviews with more than three hundred members of the political and economic elites The findings are extensive but in general they demonstrate that where political and economic power is more broadly distributed where elites are more open and accessible and where organizational life is more active and coordinated regions tend to develop qualitatively as well as quantitatively showing increases both in productivity and in such benefits as public services housing education and a more balanced distribution of income If these characteristics are absent regions may be industrialized but do not provide a broad sharing of the benefits Walton places a good deal of emphasis on the role of foreign investments demonstrating that the more penetrated regions are also the less developed Finally the results of these studies are used to evaluate and advance theories of

underdevelopment and particularly of economic dependency *Die mexikanische Gewerkschaftsbewegung* Renate Rott, 1975

State in Society Joel S. Migdal, 2001-08-27 The essays in this book trace the development of Joel Migdal's state in society approach. The essays situate the approach within the classic literature in political science, sociology, and related disciplines but present a new model for understanding state-society relations. It allies parts of the state and groups in society against other such coalitions, determines how societies and states create and maintain distinct ways of structuring day-to-day life, the nature of the rules that govern people's behavior, whom they benefit and whom they disadvantage, which sorts of elements unite people and which divide them, and what shared meaning people hold about their relations with others and their place in the world.
