Shang Han Lun:

Discussion of Cold Damage (Shang Han Lun) Guohui Liu, 2015-11-21 A major new translation of the Chinese classic Shang Han Lun by scholar and medical doctor Guohui Liu makes this foundational text fully accessible to English speaking clinicians for the first time Extensive study and research underpins the translation the author's understanding of both classical and modern Chinese enables him to interpret fully the ancient work within the theory of Chinese medicine An extensive commentary explains the translation the difficulties with the text how it has been subsequently translated and expands on the theory laid out in the original text to reach an understanding that can be applied in the clinic for diagnosis and treatment The value of this classic text lies primarily in its establishment of a basic framework for differentiation and treatment but it also presents 112 formulas and 88 medicinal substances which are commonly applied in clinical work for various conditions In this edition the 112 formulas are fully explained in the context of the clinical experiences of well known ancient and modern doctors and they are also laid out in two appendices cross referenced to the text *Treatise on Cold Injury* Zhang Zhongjing, The Shang Han Lun simplified Chinese traditional Chinese pinyin Shāng Hān Lún known in English as the Treatise on Cold Damage Disorders or the Treatise on Cold Injury is a Chinese medical treatise that was compiled by Zhang Zhongjing sometime before the year 220 at the end of the Han dynasty It is amongst the oldest complete clinical textbooks in the world and one of the four canonical works that students must study in traditional Chinese medical education today The current edition is in ten volumes including the first to chapters on pulse diagnosis The Shang Han Lun has 398 sections with 113 herbal prescriptions organised into the Six Divisions corresponding to six stages of disease

Foundations of Theory for Ancient Chinese Medicine Guohui Liu, 2015-06-21 Discussion of Cold Damage Shang Han Lun and contemporary texts of ancient China form the bedrock of modern Chinese medicine practice yet these classic texts contain many concepts that are either hard to understand or confusing Based on over thirty years medical practice and study of the texts this book explains the concepts involved so that the clinical applications of the ancient texts can be better understood and put into practice The author looks at the larger context of ancient Chinese culture and philosophy in terms of theoretical knowledge scholarly approach and mindset in order to explain the basis for the medical texts He also discusses the work of later Chinese medical scholars in elucidating the texts He then goes on to look at more specific issues such as the six conformations zang fu organ theory the theory of qi and blood the theory of qi transformation and how these are understood in the ancient texts He also discusses shao yang and tai yang theory the element of time and its place in understanding six conformations diseases This remarkable work of scholarship will clarify many questions about the interpretation of the ancient texts for modern use and will find a place on the bookshelf of every practitioner of Chinese medicine as well as on those of scholars of Chinese medicine **Shang Han Lun** Zhang Ji, 2022-07-26 The Shang Han Lun has been a primary treatment theory and practice source for nearly two millennia Its author Zhang Zhong Jing has been

named the Chinese Hippocrates to highlight the depth and breadth of his contribution to traditional Chinese drug therapy. This edition features the Chinese text Pinyin transliteration and an English translation of the entire Song Dynasty text; the content and textual order most used in Asia. Just as in Chinese language editions, it is fully supplemented with notes and commentaries. The notes describe the clinical symptoms Zhang Zhong Jing associated with the Chinese terms. For example, modern interpretations of a moderate pulse often refer to the speed of its beats. The same term when used in the *Shang Han Lun* refers to a pulse that is loose, soft, and harmonious. Such notes provide practitioners with the clinical observations necessary to properly apply the information. The commentaries further enhance the text's clinical utility by explaining the theoretical and practical foundations behind the lines of text. Because entire bodies of theory and practice can be associated with the terms and expressions used in canonical works like the *Shang Han Lun*, commentaries have become a standard means of knowledge acquisition for Asian students. The commentaries in this edition serve exactly the same purpose, greatly enhancing its utility. The introductory matter explains the background of the text, the conceptual structure of its contents, and the problems of exegesis. The appendices are designed to assist those studying Chinese and the glossary and the full Pinyin-English index make this an easily accessed reference.

张仲景《伤寒杂病论》 Zhongjing Zhang, Robin Marchment, 2008. *Shang Han Lun* was written in approx. 200 AD and remains a seminal text in Chinese medicine literature and is mandatory study in all accredited courses of Chinese medicine today. It analyses the aetiology and pathogenesis of acute upper respiratory tract infections, the common cold, influenza, bronchitis, asthma, and describes the many permutations as well as subsequent complications. It is not just a study of coughs and colds but lays the groundwork for Chinese medical theory and its strategies of treatment. It also explains the consequences of incorrect treatment and discusses how the omission or addition of even one herb to a formula can affect its efficacy. This is the book that makes understanding a complex classic text easy. Greta Young benefits the reader with her years of expertise in studying and lecturing in the classics and guides us through the myriad clauses, elucidating their meaning, citing points of discussion from various sources, and illustrating their application with modifications and case studies. Robin Marchment has translated each clause in a way which is faithful to the original Chinese whilst still making the meaning accessible to the English speaker. The explanations and discussions use clear English in a free-flowing, lecturing style which holds the reader's interest. Each chapter or section is introduced with an overview; key points are highlighted and summarised at the end, and in addition, both Ancient Applications and Modern Applications are described. The objective is to make it interesting, readable, and of practical clinical significance to today's practitioners.

Shang Han Lun Zhongjing Zhang, 1981. **The Clinical Application of Shang Han Lun Formulas** Rui-chun Chen, Li Mei, 2009. The *Shang Han Lun* is widely regarded as one of the most important books in Chinese medicine, yet it is also considered the most difficult to master. This title presents case studies organized around the use of nearly 50 classical formulas, followed by other case studies from the author's extensive clinical experience. **Journal of the China Branch of the Royal Asiatic Society**
