collaborative efforts of multiple entities acting together Agency isn't the faculty of an individual entity or self it's always the function of a network or assembly of actors Second many of the actors involved in these processes are nonhuman things without intentions will or even awareness This relational and collective approach adopts a conception of action that doesn't hinge on mental states To act is to participate in contribute to shape facilitate organize constrain and modify the course of events This book argues that there's no such thing as an individual action and that agency is collectively distributed across a heterogeneous field of human and nonhuman actors Provided by publisher *Pathways to the Afterlife* Julia M.
