The Shaping of Modern Brazil Louisiana State University (Baton Rouge, La.). Latin American Studies Institute, Louisiana State University (Baton Rouge, La.). Department of Sociology, 1969 The Shaping of Modern Brazil. Edited by Eric N. Baklanoff Eric Nicolas BAKLANOFF, 1969 **Form and Feeling** Antonio Sergio Bessa, 2021-02-09 Winner 2022 Association of University Presses Book Jacket and Journal Show in the Scholarly Illustrated Category A significant contribution on the development and aftermath of post World War II Concretism in Brazil Form and Feeling features a collection of essays by noted scholars exploring the sensorial experience based and participatory practices pioneered in the 1950s by artists and poets such as Flávio de Carvalho Ivan Serpa Hélio Oiticica Haroldo de Campos Mary Vieira Lygia Pape Anna Maria Maiolino Lygia Clark Waly Salomão and Emil Forman among many others Fourteen thought provoking essays examine how many of their strategies constituted a pertinent critique of the country's wide ranging embrace of Eurocentric modernity while anticipating a number of practices prevalent among contemporary artists today namely the rise of art as social practice the embrace of pedagogical concerns by artists and relational aesthetics The fourteen essays collected in this volume consider the ramifications of modernist abstraction in the second half of the twentieth century and contribute to a growing academic field in postwar Brazilian and Latin American art history Contributions to this anthology examine the development of modernist ideas that flourished in Brazil during a controversial period interspersed by dictatorial regimes The global aspect of Brazilian art is especially evident in these studies presenting the relational complexity of their subjects as transcultural transnational actors while simultaneously contributing to a growing increasingly nuanced understanding of visual and material culture performance and criticism in Brazil Form and Feeling continues the important process of re-analyzing the intersections of Concretism and Neo-concretism arguing for greater affinities between the primary and lesser known cast of characters while equally redistributing the strict geographical divisions of São Paulo and Rio de Janeiro This anthology broadly situates this extraordinary period of artistic experimentation in direct relationship to contemporary factors such as psychoanalysis educational systems poetry politics and feminism It crafts innovative relationships about the constructive hierarchies of form and space poetry and painting and mathematics and philosophy thus engendering new positions for a deeply ensconced period in Brazilian history **Brazilian Social Ways** Emma Johnson, 2025-02-20 Brazilian Social Ways explores the intricate web of Brazilian society revealing how deeply ingrained cultural practices shape daily life This anthropological examination highlights the unwritten social norms governing behavior and identity These norms maintain social order and influence everything from family structures to public rituals For instance kinship networks provide a crucial sense of belonging and support The book journeys through key social domains beginning with the historical context of Brazilian social anthropology It then examines the significance of family and kinship the role of religion and spirituality highlighting the syncretic traditions and public life including social interactions in urban spaces The book adopts an

innovative approach by focusing on everyday practices utilizing ethnographic storytelling to bring research to life This makes the book valuable for anyone seeking a deeper understanding of Brazilian culture and social interaction within Brazil

Blacks & Whites in São Paulo, Brazil, 1888-1988 George Reid Andrews, 1991 For much of the twentieth century Brazil enjoyed an international reputation as a racial democracy but that image has been largely undermined in recent decades by research suggesting the existence of widespread racial inequality George Reid Andrews provides the first thoroughly documented history of Brazilian racial inequality from the abolition of slavery in 1888 up to the late 1980s showing how economic social and political changes in Brazil during the last one hundred years have shaped race relations No laws of segregation or apartheid exist in Brazil but by looking carefully at government policies data on employment mainstream and Afro Brazilian newspapers and a variety of other sources Andrews traces pervasive discrimination against Afro Brazilians over time He draws his evidence from the country's largest and most economically important state São Paulo showing how race relations were affected by its transformation from a plantation based economy to South America's most urban industrialized society The book focuses first on Afro Brazilians entry into the agricultural and urban working class after the abolition of slavery This transition Andrews argues was seriously hampered by state policies giving the many European immigrants of the period preference over black workers As immigration declined and these policies were overturned in the late 1920s black laborers began to be employed in agriculture and industry on nearly equal terms with whites Andrews then surveys efforts of blacks to move into the middle class during the 1900s He finds that informal racial solidarity among middle class whites has tended to exclude Afro Brazilians from the professions and other white collar jobs Andrews traces how discrimination throughout the century led Afro Brazilians to mobilize first through the antislavery movement of the 1880s then through such social and political organizations of the 1920s and 1930s as the Brazilian Black Front and finally through the anti racism movements of the 1970s and 1980s These recent movements have provoked much debate among Brazilians over their national image as a racial democracy It remains to be seen Andrews concludes whether that debate will result in increased opportunities for black Brazilians Winner of the 1993 Arthur P Whitaker Prize **The**
