Enchantment

If a player would draw a card, that player removes the top card of an opponent's library from the game face down instead. Each player may look at and play cards he or she removed from the game with Shared Fate as though they were in his or her hand.

Shared Fate:

Citizenship and Education in Liberal-Democratic Societies Kevin McDonough, Walter Feinberg, 2003-08-28 The essays in the volume address educational issues that arise when national sub national and supra national identities compete How can we determine the limits to parental educational rights when liberalism s concern to protect and promote children s autonomy conflicts with the desire to maintain communal integrity Given the advances made by the forces of globalization can the liberal democratic state morally justify its traditional purpose of forging a cohesive national identity Or has increasing globalization rendered this educational aim obsolete and morally corrupt Should liberal education instead seek to foster a sense of global citizenship even if doing so would suppress patriotic identification In addressing these and many other questions the volume examines the theoretical and practical issues at stake between nationalists multiculturalists and cosmopolitans in the field of education The fifteen essays plus an introductory essay by the editors provide a genuine productive dialogue between political and legal philosophers and educational theorists

Emotion and Traumatic Conflict Michalinos Zembylas, 2015 This work creates a space at the intersection of multiple discussions on emotion conflict and critical peace education It draws on academic literature that attempts to highlight the possibilities and the pitfalls of considering the role of peace education in healing and reconciliation

Canadian Environments Robert C. Thomsen, 2005 Responding to the comprehensive topic Old Environments New Environments scholars from a variety of disciplines reflect the various connotations that the term environment carries in a Canadian context Whether moving within the realm of foreign policy visual arts constitutional questions tourism nature preservation or aboriginal rights these essays put the capaciousness and cohesiveness of the nation to the test by illustrating the pressures enforced upon it by multiculturalism the claims for self determination anti confederate agitation and globalisation The environments scrutinised are many and various but within each the linchpin remains the quest for identity on the part of the individual the group or the nation at large Individually as well as collectively the essays in this volume constitute an important contribution to the ongoing debate on Canadianness

Representation and Democratic Theory David Laycock, 2011-11-01 With public confidence in representative institutions dropping to distressing levels it is time for political theorists to reconnect issues of representation to considerations of justice rights citizenship pluralism and community Representation and Democratic Theory investigates theoretical and practical aspects of innovative political representation in the early twenty first century It reveals the complexity of contemporary political representation and the importance of re invigorating public life outside legislatures political parties and competitive elections A crucial supplement to empirical studies of conventional political representation this book offers a timely and thought provoking contribution to contemporary democratic theory It will be a necessary and welcome addition to the libraries of many political and social scientists

Education, Justice, and Democracy Danielle Allen, Rob Reich, 2013-03-04 Education is a contested topic and not just politically For years scholars have approached it from

two different points of view one empirical focused on explanations for student and school success and failure and the other philosophical focused on education's value and purpose within the larger society Rarely have these separate approaches been brought into the same conversation Education Justice and Democracy does just that offering an intensive discussion by highly respected scholars across empirical and philosophical disciplines The contributors explore how the institutions and practices of education can support democracy by creating the conditions for equal citizenship and egalitarian empowerment and how they can advance justice by securing social mobility and cultivating the talents and interests of every individual Then the authors evaluate constraints on achieving the goals of democracy and justice in the educational arena and identify strategies that we can employ to work through or around those constraints More than a thorough compendium on a timely and contested topic Education Justice and Democracy exhibits an entirely new more deeply composed way of thinking about education as a whole and its importance to a good society **Medical Men and Their Work** Eliot Freidson, Judith

Lorber, 1972 **Energy** Robert Bent, Lloyd Orr, Randall Baker, 2002-05 In the early 2000s energy prices have fluctuated wildly from historic highs in the winter and spring of 2001 to the lowest wholesale prices in decades a few short months later As the largest user of fossil fuel energy the United States is the key player in the world's energy markets and our nation's energy policy or lack thereof has become a subject of increasing concern Energy Science Policy and the Pursuit of Sustainability is an essential primer on energy society and the environment It offers an accessible introduction to the energy problem its definition analysis and policy implications Current patterns of energy use are without question unsustainable over the long term and our dependence on fossil fuels raises crucial questions of security and self sufficiency This volume addresses those questions by examining the three broad dimensions of the issue physical human and political economic Chapters consider the laws of nature and the impacts of energy use on our physical and ecological life support systems the psychological social and cultural factors that determine how we use energy the role of government actions in adjusting costs influencing resource consumption and protecting the environment how markets work and the reasons and cures for market failures in responding to long term environmental and energy problems Energy links energy use with key environmental issues of population consumption and pollution and offers readers a range of material needed for an informed policy perspective Sandra Belloni George Meredith, 1889 She'erit Hapletah, 1944-1948 Israel Gutman, Avital Saf, 1990

Ellis, 1998 For Palestinians the 1948 massacre by Irgun and allied Stern Gang soldiers of more than 200 residents of Deir Yassin a tiny village near Jerusalem resonates sharply as a focal point of history The resulting forced exile of over 750 000 Palestinians in 1948 over two million scattered in a far flung diaspora today remains at the heart of the Israel Palestine conflict Remembering Deir Yassin brings together Palestinians and Israelis Jews Muslims and Christians Jewish theologians and Palestinian priests to reflect on the fifty year legacy of Deir Yassin **Humanistic Judaism** , 1967 *Conservative*

Judaism, 2001 *Mind and Its Treatment* Veikko Tähkä, 1993 *Deliberative Democracy and Divided Societies* Ian O'Flynn, 2006 In a world where the impact of internal conflicts is spreading ever wider there is a real need to rethink how democratic ideals and institutions can best be implemented This book responds to this challenge by showing that deliberative democracy has crucial but largely untapped normative implications for societies deeply divided along ethnic lines Its central claim is that deliberative norms and procedures can enable the citizens of such societies to build and sustain a stronger sense of common national identity More specifically it argues that the deliberative requirements of reciprocity and publicity can enable citizens and representatives to strike an appropriate balance between the need to recognise competing ethnic identities and the need to develop a common civic identity centred on the institutions of the state Although the book is primarily normative it supports its claims with a broad range of empirical examples drawn from cases such as Bosnia and Herzegovina Lebanon Macedonia Northern Ireland and South Africa It also considers the normative implications of deliberative democracy for questions of institutional design It argues that power sharing institutions should be conceived in a way that allows citizens as much freedom as possible to shape their own relation to the polity Crucially this freedom can enable them to reconstruct their relationship to each other and to the state in ways that ultimately strengthen and sustain the transition from ethnic conflict to democracy *State and Labour in New Order Indonesia* Robert Lambert, 1997 Features chapters written by key figures in Indonesia's new labour movement offering insights into the social and political consciousness of segments of Indonesia's new urban working classes The character of the responses to these new social forces will have a direct bearing on future political transitions *Location, Location, Location* Cheryl "Li".
